Thread: [Disputes of payment - Server2Go UID: 2752357](#)

exploit.c - March 11, 2016, 9:10 pm

Apologies for the brief thread, I'm on mobile but will update with more proof tomorrow when I wake.

Server2Go bought my Reddit bot, and asked for help, I proceeded to give them assistance but it wasn't "fast enough" for their liking so they blocked me and disputed the payment via PayPal.

PayPal - disputer:

Amount: \$10

More info:

Spoiler ([Click to View](#))

More information:

- The link he was trying to upvote was an advertisement, this bot does NOT support advertisements, only regular posts, therefore it didn't work... for obvious reasons - he didn't read what it supports and what it doesn't support.

Evidence:

Link in reference:

https://www.reddit.com/comments/49e0sg/cheap_minecraft_servers_ddos_protected_and_100/

Furthermore, he kept putting broken links in for a long time - and very very impatient, he kept pming me constantly, and demanded assistance when it wasn't my problem - it was his.

And when I tried to reply to him in the PM, he had put me on the ignore list and disputed payment. I tried telling him he's incorrect in how it functions and how to properly use it, but his ignorance got the best of him, clearly.

Screenshots:

Spoiler ([Click to View](#))

There is more screenshots of him being arrogant and not even putting the right config and putting dead proxies into the bot and expecting it to work when he's not even following instructions.

Seems legit op.

If you sent tracking to pp hopefully you will win.

Seems fairly clear what bot does to me..

Cheers

exploit.c - March 12, 2016, 8:10 am

He won the dispute this morning. DWC on him.

CloudHub - March 12, 2016, 12:23 pm

bot doesn't work at all he wont help me this kid is a top skid very rude person and he didnt win the dispute even showed pp that what he sent was not even working

all those messages i sent you and you ignored them all only ones you replied to are the ones when links didnt work now there working your bot doesn't even function at all even from your rep like 10 other people have said how rude you are

Top skid? lol. You input a invalid link and expected it to work? Wrong. You didn't want to wait since you're an incompetent impatient little twat. It's all good though I'm phoning PayPal Monday to get the money back since you're a cunt. ^,^ and yeah, I am rude, because you're a little incompetent twat.

Furthermore to my last post, all my customers have no issues since they use it properly.

StevesTrolls - March 12, 2016, 12:36 pm

Good luck getting this resolved, surprised people don't read what they can and can't do when they purchase something.

CloudHub - March 12, 2016, 12:50 pm

i tried just normal posts still didnt work and all good already phoned them and asked them is there anyway this skid could get the money back and they said nope all done and dusted theres no way you can get my money back so have fun mate

You probably didn't even use valid proxies and accounts. You're mentally retarded lol.
I'll even post a video of it working when I get home and I'll show PayPal and post here.

You're a incompetent twat

Incompetence is high I suppose, because it clearly states what it supports.

Something tells me that the kid that bought the bot doesn't even realize that he needs proxies and accounts.

You will always have to deal with some idiots. Just put up with them.

CloudHub - March 12, 2016, 12:55 pm

Used the right proxies and accounts all working checked as well you're the incompetet twat also other people have tried this and it dont work for them as well with working proxies and accounts

Rather than disputing it, why didn't you consider communicating with the seller and trying to resolve it properly to confirm it actually 'wasn't working'?

I'll be posting a video tomorrow showing how incompetent you are

Lol after you fix it you said when you get home and your already home but know theres a bug and will take you till tomorrow to fix you fucking little skid lol

(Mar 12, 2016 03:26 PM)Servers2Go Wrote: [\[CITE\]](#) Lol after you fix it you said when you get home and your already home but know theres a bug and will take you till tomorrow to fix you fucking little skid lol

1. Your sig is broken and it's really annoying.
2. You need to put your attitude in check. Just because something didn't work the way you thought it did doesn't mean you have the right to start going off on people.

AND If he knows it has a bug in it and he said it would be fixed by tomorrow, why would you chargeback? He was obviously working on fixing the issue. You have no patience and quite frankly I don't think I would want to do business with someone like you. You sound like an arrogant child who wants some candy but your mom told you no.

On top of all of that. It looks like you have a history of trying to get refunds. Just look at your rep.

It's pretty damn amusing how it only breaks for you (since you don't put valid URLs), and works for everyone else. No bugs exist. Grow up you twat.

Exploit i had 12 people try it on different sites and its broken for them not just me you retard

(Mar 12, 2016 04:01 PM)Servers2Go Wrote: [CITE](#) Exploit i had 12 people try it on different sites and its broken for them not just me you retard

"12 people" all from your IP right? Oh did I forget to mention I log the IP addresses to which licenses are accessed from and I suspended your access, oh did you not know that? Shucks. Go ahead remove the license! It's in the bin and has 3 failsafes so please, be my guest. Good news though! I've sent complaints to your ISP for piracy, and your local police :)

HAAAAAAAAAAAAAAHAAAAAAAAAAAAAAAAAAAAAAAAA
AAAAAAAA

LOL dude look your making me laugh hard and hard each time

bot opens fine and still has bs error there is no licensing faggot lol

exploit.c - March 12, 2016, 3:52 pm

[illegible]

bot opens fine and still has bs error there is no licensing friend lol

You're still lying which is amusing, go ahead "leak it" - I record all access entries and I've disabled the unique ID attached to your copy so it won't work, no one else has any issues with it but you're too fucking incompetent to realize that.

So, you can go ahead "leak" my product, I'll just keep recording information and maybe I'll add to my post a "hall of idiots" with full IP logs who accessed, computer details (name, hwid, os, perm level), and guess what? It has auto updating built into the code so I can easily push some annoying update for your copy to open thousands of message boxes and crash your computer just because I love knowing you're angry.

CloudHub - March 12, 2016, 4:48 pm

am angry ? dude am happy and can you read as i said i installed it on a vm you skid and what business are you on about the one from ad on reddit ? that was a test you retard LOL also you cant recover money from a closed case its the whole point of a closed case you thick cunt lol

StevesTrolls - March 12, 2016, 11:38 pm

Well, even if the case is closed, the decision can still be appealed.

It works perfectly, you're just an arrogant incompetent little fuck, this dispute isn't solved, I'm going to get the money back and you're just a retard. You "leaked" the product, but your unique copy was perm disabled, so good luck with it ever working.

All my other customers are 100% satisfied, you're just a retarded twat. By the way, I sent in complaints to PayPal, and your domain provider, and WHMCS indicating you're unlawfully registered these items, and that the money is suspected proceeds of crime, therefore you should be suspended shortly. I also called Matt at WHMCS, and he assured me he'll look into your license and "do what is necessary" - btw, did I mention me and Matt are friends?
