It's not terrible (all the information is there and it's clear as to what you're trying to sell), but it's overly simple and the graphic of Mark Zuckerberg doesn't really help make the e-book seem professional.

Cannot tell if you're being serious or not with this thread,

Temp_1938275 - March 12, 2016, 12:11 pm

It looks like it was made with basic fonts and it makes it look very cheap.

Illus Traitor - March 12, 2016, 2:54 pm

I cant tell if its serious either. It's not very appealing.

Rebus - March 12, 2016, 2:55 pm

Fucking hell, a 5 year old could do better than that. For the life of me I honestly hope you aren't serious.

Thomaz000 - March 12, 2016, 6:38 pm

I was 50% serious , other just for a laugh

?hoenix - March 12, 2016, 7:07 pm

I feel like this was made in Microsoft Paint.

This thread is a troll for sure.

If, however, you are being serious then this looks like trash. I'm sorry but it does.

This looks like it was made in 5 minutes in Microsoft paint.

0/10 for this trash of a "thread design."

If you want to make it better than please learn Photoshop.

Some really good memes brewing up around here.

SmileyBear24 - March 12, 2016, 11:09 pm

Looks unprofessional, the writing is larger than it should be blinding me.

A variation of styles would help.

Thomaz000 - *March 12, 2016, 11:19 pm*

ok thanks for the honest feedback :D
enough constructive criticism for me today
