So i actually had a thing which is .. I kept buying agcs for 65% to buy iphones and sell it here for a specific store..but unfortunately some weird shit happened and i lost \$1,000 because some giftcards i bought from here were carded.. Now i am banned from amazon so is there any other way i can still do my thing? Maybe a different site? It actually was making me some good money :\$

ebay

open your own site

Buy a stealthed Amazon account if they exist, find an amazon partner aka they let you sell for like .05 of the profit or something like that.

I'm pretty sure PayPal is a lot harder to commit fraud with than Amazon...

Why don't you try that forex method you said you had that couldn't fail that made tens of thousands of dollars?

What do you mean try? I thought you said there's no chance of failure? Why waste your time on risky carded gift cards when making so much money with 0 chance of failure is an option?

U wont make \$10k from the first day.. U will make really low amount but approx each time it wont let u down .. While in here us iphones are much more expensive than the normal local ones.. There is some real profit for me in the amazon thingy

Go to a starbucks or other public wifi, clear all your browsing data and make a new amazon account. Only redeem codes and sign in there, never anywhere else. Find a new address to ship to (friends, family) or even straight to the retailer and you're golden.

Make a new wonderful amazon account, only buy GC's from trusted users.

If that means buying a \$25 GC at a time, then do that. Don't go buy a \$1000 GC. Larger amounts are usually carded.

Buy \$20-100 gift cards, and let it add up.
