Yes currently at 80,000 not really sure what to do at this point. Any tips?

Just hit 100,000 anyone help me what to do next

Cash it out now while you can buddy. You'll most likely end up losing it otherwise.

TubeYuber - March 13, 2016, 10:27 am

Might just do that, really wanted to hit \$100 but still. I think I'll cash out play it smart :)

Doodlegod - March 13, 2016, 10:29 am

Cash out half and then play some more if you really want to.

Yesterday I turned \$23 into \$80, took out half and turned that half into \$80 again and kept going. Got to \$100 then lost it all. Deposited the \$40 I took out and lost that too...lol

TubeYuber - March 13, 2016, 10:29 am

Session completed, went from \$7 to

Amazing man!

Congratulations hehe :)

Posting here to check back later.

Because I wanna see the message "I lost it all, I was too greedy"

bustagod - March 13, 2016, 11:18 am

Wow, good earnings!

Literally in the process of transferring to Paypal. This is a happy gambling story.

Lucky lucky lucky, don't get addicted! What do you do? 5x? And how many squares do you press per round?

I'm not OP obviously but I recommend clicking 3.

I usually click 3 corners lol.

Everytime you click 3 you just about double whatever you bet.

TubeYuber - March 13, 2016, 11:27 am

What I did was start at like 70k then bet 5k on 5x then with the profits i gambled. This made it so if i lost every time i'd be back to 70k you get me lads

K l a u s - March 14, 2016, 2:55 am

I once went from 5k to 300k, but then managed to lose it all after going for 1 bitcoin cash out :(

comp13xity - March 14, 2016, 3:33 am

Satoshi mines is satan. My advice get out while you're ahead

bustagod - March 14, 2016, 6:51 am

I feel like it's rigged.

Lost 15\$.
