Thread: [What could someone do with my SSL private key?](#)

Orgy - March 13, 2016, 12:52 pm

Say for example my site was ketzen.co.uk

and my SSL private key was

are you implying that this isn't my ssl cert's private key and instead some [scammer's](#)?

minimalist - March 13, 2016, 12:55 pm

I'm not sure, but I guess we'll wait and see.

no offcourse not, obviously it's your website, obviously..

exploit.c - March 13, 2016, 12:58 pm

this made my day, Imfao. top keks

Pillows - March 13, 2016, 12:58 pm

Create your own SSL cert for the website. Somehow do a MITM attack and get session info.

b?xxy - March 13, 2016, 12:58 pm

Thank you Orgy for making my day.

right but say that i maybe only get like 20 unique visitors a day

MathiasHansen - March 13, 2016, 1:00 pm

Oh how I do love you Orgy

only in reputation

We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.

Are you 100% sure? Because it doesn't sound logical at all.?

Oh, before you waste your time; you already negged me.
