Thread: [Servers2Go - Site compromised, scammer](#)

exploit.c - March 13, 2016, 1:27 pm

Hey all,

Servers2Go owns ketzen.co.uk - his SSL private key was compromised today, and he's a known scammer.

Scam thread (caution: his incompetence is showing very much):

<https://hackforums.net/showthread.php?tid=5200449>

SSL private key exposure: <https://hackforums.net/showthread.php?tid=5202199>

Site: ketzen.co.uk

He doesn't care about his site, hasn't changed the SSL, and he's incompetent, avoid at all costs.

Orgy - March 13, 2016, 1:28 pm

oh man any idea how his key got compromised? shit man that sucks

Pretty sure I saw in an IRC someone claimed to be using "magic pixy dust because hacking is illegal"

ye this is absurd and an absolute disaster

these kind of things shouldnt happen to active hackforums members

maybe we should have a group post on security, showing how to properly jail your servers?

samesies. sounds like a great irc

exploit.c - March 13, 2016, 2:23 pm

I'm shocked he hasn't got a new SSL cert yet, guess he don't care about his customers.

He changed his username to "eric read has autism"
