Information

Welcome to the HackerCraft! A new and innovative spin on the HackerCraft server. My team and I, along with a few other contributors have helped to create the newest version of HackerCraft and we hope you enjoy the server. Feel free to join using the IP below, and use this thread to report any issues or ask any questions that you may have.

Factions

Join the wonderful world of HackerCraft's Faction server. Join others and create a faction, fight against others , and watch your back in this immersive Player versus Player game mode!?

KitPVP

Stab, shoot, stomp, hide, summon, and so much more in this fast paced Player versus Player game mode! Pick from over 15 kits and battle other players to claim victory, glory, and wealth!

SkyWars

Battle in this crazy free for all game mode, but careful not to fall off the edge! Get random items from chests in an attempt to fight and survive while building and jumping from island to island!

TnTWars

Boom! Defend your flag, and try to survive in this whacky game. Grab your TnT and launch it at your opponents in an attempt to destroy their flag or kill them all!

Survival Games

Start next to the enemy in a race to the chests. Grab your gear, and fight to the death in this epic and chaotic free for all game mode!

NeoCode - March 13, 2016, 3:56 pm

ChangeLog:

Cactus, SugarCane and Iron Prices were adusted to better suit the new changes

A tax system was added where all transactions have a 7% tax paid by the sender/buyer

Spawner prices now go up in price every time you buy one (Ex: 1st one is \$500k, next one and everyone one after is \$625k so on and so forth, a 25% increase)

PlayerAuras were added and will be buyable in the future

NoCheat was updated and checks have been made to be smoother

Growth rates were increased slightly to compensate for the decrease in prices

The Sell Inventory signs were removed BUT will be returned with a new way to sell in coming week

You can now sell a player's head for 2% of their worth and the player whose head is sold loses 3% of their worth

A new marketplace was added, access it using /ah

HackerCraft now has a lottery system that draws every 12 hours and buy a ticket for \$1k using /lottery buy

Players now have the ability to /tptoggle
Voting has been added and you may vote (Links will be added to /vote shortly)
Random missions are now player-specific and a toggle for the messages will be added soon
Auctions now also have a 7% tax to the seller
Vote Party has been added, details to be released shortly
Anti-Xray has been fixed and now should work better
PvP Arena was added, there are four hatches within spawn with a hologram above them, jump and slay em all!
The End was reset and all claims cleared in the end
Teleport timer reduced to four seconds

Starting out where the server is new and nobody has done much, you can make it on your own. But after like 2 weeks, I'd say you better get yourself at least 2-3 others to party up with because the factions will be built and people will be hunting you down lol.

Lawsuit - March 14, 2016, 2:27 pm

is there gonna be a SMP server?

Shoe - March 14, 2016, 4:48 pm

Couple of things that I've noticed.

A) The economy seems fairly broken. Some items are worth more than others for no rhyme or reason from a player's perspective. Additionally, TNT being incredibly expensive and the lack of homes (currently broken, however it looks like 7v2 is working on some stuff; we went from 1 home, to "2-3", to some players having 11, 8, or whatever, then back to God knows what at the moment) doesn't make this much of a raiding server, I was telling Qwerty that it was more of a "sit on your ass and stay in the cave you dug" server at the moment, instead of a raiding server. Granted the low player count may result in a lack of raids (which I fully expected) but being limited in homes, not having the ability to purchase items quickly and fairly easily make me feel like the server is less factions at the moment and more Cave Sim 2016.

B) Forge not working makes me sad. :(Dunno if that's the fault of Bungee or Forge or the staff or all 3, but I'd really like some client side mods. :/ If Forge was disabled by staff, I'm curious as to why. Some players use clients and are fairly open about it, so I don't know why Forge mods (whether they give an unfair advantage or not) would be disallowed.

I'll edit this if I think of anything else, but there was one more thing I wanted to talk about. Completely spacing on it.

Juan - March 14, 2016, 4:59 pm

I've been getting some extreme lag on the server and have died 3 times cause of it losing all my

stuff so yeah i dont like it so far, wont be coming back on till the server is fixed.

One of our proxy nodes is down so it's affecting people in that area. You can use 1.8.x or 1.9 to play.

(If you really want to play connect to a VPN and try, the server is up just an issue with a node right now)

Fiber - March 16, 2016, 12:59 pm

Alright so here's the update on why the server is disconnecting you.

Voxility is currently switching our nodes constantly as they are changing the infrastructure a tad so that's why people are being kicked and able to rejoin, it will be fixed when they completed their work.

Adding on to my other post, we are setting up another GRE tunnel so if this happens again people can use the backup proxy instead but if this one was to go down (eg ddos) you will have to use the main proxy.

That sounds like a better idea, and withers add an element to raiding and defense. Best defense against withers is water and we might increase obsidians resistance to wither attacks to more hits. Better to scale than to remove it completely.

Does it needs premium Minecraft account ? i am using cracked version of minecraft, my premium account is suspended :/

i tried with all version between 1.8 to 1.9. getting same error.

but i am able to play on other servers with cracked version.

You do need a premium account yes.

Nice, I'm going to join soon

Rubixa - April 23, 2016, 7:26 pm

Just got minecraft so I can play with ya'll :D

Dredd - April 25, 2016, 6:32 am

If you guys need some more servers for hosting hit me up.

Thanks,
?

Hmm its up for me?

NeoCode - May 2, 2016, 2:48 pm

us.hackercraft.net is up, please use that for now.

What version are u playing on try 1.8

Gt403cyl - May 2, 2016, 2:55 pm

I use 1.9 and everything is working fine.

When you load the game edit your profile (bottom left corner on the window where you click "Play") and change the version to 1.9, sounds like you are trying to use 1.9.2

Just got Minecraft today.

EDIT: 1.9 how do I downgrade?

hope i helped

What your ign?

welcome to the server. I hope you will stay. Looking to get to know you. Tommy is also playing.

HayceLem - May 5, 2016, 5:43 am

Without whitelist i can connect ?

Yes you can always connect.

Sadistic - May 18, 2016, 5:36 pm

Question, Is this going to continue after Fiber's self ban?

NeoCode - May 19, 2016, 12:32 pm

Yes the server will continue

Mangekyo - May 20, 2016, 8:35 pm

Why'd Fiber self-ban himself :(

Mr Chow - May 21, 2016, 6:59 am

I cant connect.. server is down?.

chase. - May 21, 2016, 2:01 pm

#MakeHackerCraftGreatAgain everyone get on

guini1008 - May 30, 2016, 12:29 am

yeah i want to play it! lets having fun!

labroca - June 12, 2016, 11:45 am

I cannot connect so I assume this is Hackercraft failure #8 or #9 by now?

T0xic4mbu5h3r - June 28, 2016, 9:29 am

Hopefully it will return again. Who knows right?

'OverSight - June 28, 2016, 10:44 pm

This is what happens when you get nazi mods to run the server.

@minimalists

@narurto

@fiber

@intelligen sin

Shrooms - July 1, 2016, 4:07 pm

Really glad to see this has returned, I've been away from HF for a while.

Look forward to seeing everyone there :)

Edit:

Maybe not from the looks of things

Mangekyo - July 3, 2016, 1:18 pm

Hooray for HackerCraft, lasted barely 1/3 of a year. Yay!

Shrooms - July 5, 2016, 3:56 am

Really sad to see this server die, once again.

Would love to see this server actually revive one day, it was great back in the day! ?
