Thread: [\[Official\] Squad Official Information](#)

Divined - March 13, 2016, 5:12 pm

Squad is a group which is based around making money online. It's main goal is to gather individuals which are skilled in all possible domains and combining them for the greater cause, which is earning money. A key asset you need to have to be able to join this group is co-operating with other people in a friendly matter.

Everyone who is recruited to the group will be put under a temporary trial status. He's going to have to prove his worth for him to remain in the group, since we're not looking to have members sit around and do nothing. After proving their worth they will be gaining a regular member status which stands as their verification within the group and also proving their dedication to the Squad.

In order for the members to prove themselves, they're going to have to be working under a leader, depending on the domain which they're going to be assigned to, according to their skill set. Once they are a part of that domain it is their duty to work projects out with the leader which they do believe could be valuable to Squad.

We are going to be pushing a lot of products on the market within HF but we're not going to be remaining only within HF's boundaries when it comes to making money online.

I can't get over the name of this group. The word "Squad" just sounds like a thing from Twitter & IG's related to hoods and gangs.

Good luck with the group though. I see you are already sharing content around the forums.
