What is Kava?

Kava kava (*Piper methysticum*) has been used as a ceremonial drink in the Pacific Islands for hundreds of years. Some people report its effects are similar to alcohol. The roots are chewed or ground into a pulp and added to cold water. The resulting thick brew, which has been compared to the social equivalent of wine in France, is offered to guests and dignitaries visiting the Pacific Islands.

What are the effects?

In addition to its ceremonial uses, kava is best known for its relaxing qualities. Elevate mood

Feelings of well being

Feelings of contentment

Relaxes the body and mind

Reduces stress and anxiety

Greatly helps with insomnia

Greatly reduces social anxiety

I thought I saw someone else selling this stuff.

You're gonna need proof of all those things mentioned.

Did you even read any of this?

To seller:

Why would I pay \$12 for your powder when I can get it for \$2.4 on eBay?

What sounds cooler than a legal high!!!

But seriously, if I wanted to waste \$12 on a legal high, I'd rather waste \$12 on petrol and sniff the fuck out of it.

That shipping isn't free and takes over a week. It's also from a no-name, unreliable brand. I ship

only extremely high quality kava, [here's the brand I am selling](#).
