The best password list is one you generate yourself with Crunch and modify with WLM (Wordlist Manipulator).

Ostra - April 2, 2016, 7:57 am

Sounds too great to be true. I usually make my password lists out of old dumped passwords.

Look at his trust scan. I don't think there is a list. Plus he spreads malware on the site. Also he is just doing this for attention.

This password list can crack almost anything.

Things I've cracked with this password list!
Twitter

Facebook
YouTube
Minecraft
Skype

I haven't tried this on a lot of things but it's a really good password list for account cracking (account cracker)

Want this password list?
Don't worry I'll be happily to give it to you.
Just pm and I'll send it to you!

What do I want in return?
A thank you. Why?
I put most of this password list together myself!

Ill take this down if leachers began to come ._.
I hate people taking my work!
