Crypter Assistance

Anyone that needs help in crypting anything, having problems with crypter may ask, I'll literally answer about anything! [Offering free help via skype,pm,teamviewer]

???? - March 14, 2016, 10:32 pm

Bringing this to the top so OP can help some clueless people. :>)

Clarity. - March 15, 2016, 3:04 am

Since you opened up RAT and Crypter I'm asking this here. Its related to both subjects.
Is there are any way to make stub hard to delete even after getting detected by AV?

I don't really think so, after the AV Detects the virus It'll remove It's source, means that even if you have startup persistence It would be useless.

This is a good service OP. Are you still doing this? If you are people should take advantage of it if they are having problems Crypting.

Insane Developer - April 16, 2016, 10:47 am

How would I implement an EOF support while doing RunPE in AutoIt?
