Man in the Middle attack

So,
Hello Guys

I'm Spirit as you all know and today in this tutorial i'm gonna demonstrate you how you can perform MITM(Man In The Middle Attack) using websploit toolkit. :D

So, what what is Man in the Middle attack?

A man-in-the-middle attack is a type of cyberattack where a malicious actor inserts him/herself into a conversation between two parties, impersonates both parties and gains access to information that the two parties were trying to send to each other. A man-in-the-middle attack allows a malicious actor to intercept, send and receive data meant for someone else, or not meant to be sent at all, without either outside party knowing until it is too late. Man-in-the-middle attacks can be abbreviated in many ways, including MITM, MitM, MiM or MIM.

Hope you'll like it?

Don't call me sir please?

and i'll be glad if my tutorial will help you?

Cheerz ?

K!ngGFX - May 20, 2016, 9:05 am

are you available on skype? I just need a quick bit of help with this.

Also, what if im at home and want to target a teachers computer or my schools server, how would i
get that specific target adress or IP

Don Genovese - May 20, 2016, 2:06 pm

Nice, great tutorial, thanks for it

sure i will help you ?

and you can do some social enignnering to get their ip?

but their will be no use of their ip :p

Anymore - June 6, 2016, 6:29 am

I try to do it but not work, i using kali rolling, target was windows 8, and router is basic from Sky.
Settings:
Interface wlan0
target 192.168.0.5
router 192.168.0.1

any idea?

PS: If i try to see any img in google on the target PC, don't load any IMG

That's the problem don't give me any errors, everything is like you but i don't receive any white string about size of image and something else.

Quote:wsf:MITM > show options

Options	Value	RQ	Description
Interface wlan0	yes		Network Interface Name
ROUTER	192.168.0.1	yes	Router IP Address
TARGET	192.168.0.4	yes	Target IP Address
SNIFFER	driftnet	yes	Sniffer Name (Select From Sniffer List)
SSL	true	yes	SSLStrip, For SSL Hijacking(true or false)

wsf:MITM > run
[*]IP Forwarding ...
[*]ARP Spoofing ...
[*]Sniffer Starting ...
i wait 5 minutes but is still like before

Done, and thanks.

Also I try to do a MITM but using like sniffer urlsnarf, but i get just the link from my computer (sniffer), I sniffing myself :) and all the settings are right, i was thinking maybe i must set my wlan0 in promisc mode? No?

Don Pablo - June 7, 2016, 12:58 am

Thanks for contributing mate i can definately use this! Cheers =)
