Just started doing this.

Took me about 30 mins or so. Not done but I want some opinions on how it looks.

Excalibur - March 14, 2016, 3:28 pm

Hahahha damn skelly beans! pretty cool! kinda blurry! couldve used a better background but overall 5/10 keep it up!

SmileyBear24 - March 14, 2016, 5:00 pm

Make a copy of the background, Set the original to Luminace, lower opacity to what feels right.

Create a clipping mask of the duplicated background onto the text, opacity to where it feels right.

Add a light stroke and a medium drop shadow to the text.

:)

I know ;)

Was repeating myself. :)

Blends too much wit the background.

The 'as' in 'stash' are very difficult to read.

Yeah I decided to save it and give up. Going to try and be more creative on my next one.

Dystance - March 15, 2016, 12:59 am

Whatever background you were trying to make, keep building off of that.
