Hi ?

A batch file to show all hidden files and folders of your USB pendrive.

So ; this batch which automatically detects the letter of your USB stick can also be done automatically as administrator.

It can be used to help people whom are infected by a virus that hides their originals files and folders and transforms them to shortcuts

So we can say it is a fixtool for this problem linked to the consequence of this kind of virus.

?

Code @echo off

cls & color 0A & echo.

Ehm, nice script
But would tweaking a little setting not be handier?
