Who Are We?

Legends is a diverse group not fixed on a particular agenda. Marketing, programming, hacking, you name it - but only people who make the cut will be accepted. We strive to contribute, teach and learn as individuals. We do not consider prestige or reputation to increase any chances of getting in Legends. We expect high quality members willing to contribute to our group as well as the community - we always welcome such members wholeheartedly.

[img]http://s9.postimg.org/jzubyp2v3/LEGENDS_2_0_DELIMETER.png[/img]

Requirements

We do not have any specific requirements for applying to our group. If you feel you have a chance of entering this group, then you are free to apply.

[img]http://s9.postimg.org/jzubyp2v3/LEGENDS_2_0_DELIMETER.png[/img]

Notification To All Applicants

We do not consider rep, awards, prestige or status to be a deciding factor. You must be willing to be an active member of the group and participate in group activities & contributions. We do not endorse inactivity within the group. Please revise your application before posting it. We expect applicants to be truthful in their applications. Do not contact the leaders or the group owner regarding the status of your application. Applying via userCP instantly gets you into the groups' blacklist. Selected applicants will be interviewed through Skype or any IM service of their choice. Good luck to everyone who intends to apply!

We are currently looking for people who are one of the following. The number of slots per category is represented in green.

How much time do you devote online per day?

I am online a lot every day. Most of my life is dedicated to the online-world and it's areas. My projects are being run mainly online, therefore I have to be able to be contacted at all times, and I have to stay up-to-date in the various scenes online.

You will always be able to get in contact with me online, whether it be on Hack Forums, Skype or any other communicational manner.

[img]http://s9.postimg.org/jzubyp2v3/LEGENDS_2_0_DELIMETER.png[/img]

Which of the above mentioned categories describes you the best? Content Writer {For general description, articles, infomercials

I am a massive writing enthusiast, I can write essays in minutes as I just love escaping the world solely by words. I can easily catch myself writing a wall of text just as a single post, just because I am so into writing. There is nothing I enjoy more than just kicking back, throwing some relaxing music on and then just write. Write, write, write.

Accepting me into this position will involve in me dedicating a lot of time into the group by helping mainly creating ground-basics such as articles, descriptions for various projects presented by the group/fellow members.

I will be spending a lot of time mastering the public look of the group, making sure it is positive at all times. I will do my deed in making the group one the best ones around with my descriptive and informal writings.

I used to run my own business by the name of Agenci. Alongside some friends who worked in my firm, we were producing high quality writings for customers, which included big firms, school projects and other small projects. We were quite popular in the time we ran, and we did make some decent profit from it. I do not really care that much about the money we made, I had a bigger liking in the credit we received for our work.

Agenci was recently sold on to a third-party dealer, and is no longer run by me nor any of my friends. You can check the project out here: <http://www.agenci.dk>

Which of the above mentioned categories describes you the best? Social Engineer/Coder

I am currently very interested in social engineering and coding. I have been interested in technology ever since I was young and I have had a passion for how programs work. This is how I got into Python, I first started with C++ and have moderate knowledge of it but Python is my main language. I am currently in highschool and in the International Baccalaureate program and for this DP program you need to create a personal project, mine is creating Tetris with Python. I challenged myself with this because of the physics, shapes & colors involved.

Secondly I social engineer because I need some spare cash, I have made about \$120 in 3 days in the past with this. I am still learning the ropes with some methods. I enjoy doing both of these so I couldn't choose between the two.

I have created many programs with Python but I cannot link them here, as well as making my own eBooks on making profit. I put in a lot of work to create these as well as the thread design. I've made a lot of profit from the sales of these and satisfied many customers.

As previous work I can show this:

-<http://aeigioanpons.apps-1and1.net/> - It is a Joomla website I'm developing, mostly changing the design and adding modules (and changing them) as I need to. I have modified the template from almost 0 as it is based on the well-known template protostar ([Link](#)), maybe some can't appreciate the work it has behind, but I have modified a huge part of its css and a big part of its html too.

-Also this : I'm working around this in the college, it is a Queue which basically sends bytes and receives bytes. It is the first step before becoming a protocol ? [Link](#)

How much time do you devote online per day?: At least 4-6 hours a day minimum. Usually runs to 6-8 hours most days though.

Which of the above mentioned categories describes you the best?: I'm more of a blackhat kind of guy, I feel that the skills I have the most knowledge in is RAtIng, eWhoring, and Social Engineering. So if I had to choose 3 skills that describe me best it would be those 3.

Contributions you could expect from me: If I am accepted into the group, I will host a Regular Member -> L33T Contest in the name of Legends. I will also be giving away an award in the name of Legends in a member contest. (the selection of \$20 awards). I will also contribute to the sub-forum with only quality content and I plan on sharing my knowledge and learning from the members of Legends as well.

Can't post my CPA nich because it deals with adult content which I can not post on HF! ;) (Just simple domain name and landing page)

I have been in a couple groups here on HF and enjoyed each of them very much, but owners have sold the groups and now the groups have changed from my specialties

I'm decent at analysing binaries incase they're rats or any other malware (Security Analysts [10])

I'm finding my way through .net, making things to release here on HF (Programmers [10])

I consider myself a grammar nazi so if you need something written with grammar, I'm your guy
(Content Writer {For general description [2]})

How much time I devote to HF per day: The past week is disgusting. Maybe 2-6 hours depending

if I see something that I want to reply to. I have no reason to be active. If I were to be accepted, I would be online 10+ hours as I'm still in school and I look at .net as a future career or side job.

To be honest, I don't have any one skill or trait about me that shines out, perhaps aside from MYbb setup and leadership skills. I'm a jack of all trades. a Guy willing to put ideas into action. I've always wanted to be in a group, and well... I've been here since 2008 ?

[img]http://s9.postimg.org/jzubyp2v3/LEGENDS_2_0_DELIMETER.png[/img]

List your skills. Jack of all trades, really.

Basic VB programming experience. Made a picture message bomber back in the day.

Management / leadership. Used to own leetcoders.org (12k members at peak).

Setting up MyBB sites. Probably half a dozen in the past few years. Biggest one being LC. If its Mybb, then I'm your guy.

Marketing. Ideas, innovation. The world is full of problems to solve and innovate for.

Social engineering. I can convince most anyone to do anything if I put my mind to it. I'm also great at keeping calm in real life which helps this aspect tremendously.

Extensive ratting knowledge. Experience setting up dozens of rats. favorite: Blackshades

I like bringing people together. I like facilitating ideas and movement. Great mediator.

Myers Briggs: ENTP

If I become accepted then I will do what it takes to bring the group to new heights. New levels of achievement and recognition. I'm looking for something to be a part of, something to keep my devotion busy, something to make me some income if possible. I thrive the best when I lead people and when I am a part of something that peaks my motivation.

My thing, is that i always knew that I will make it on my own by earling money online - somehow. The thing is - none of these ebooks out there cut it. I need an inside guy, possibly a mentor, or in this case an organization to support, and help earn this stream of income. With the right system in place I know this is possible.

List your skills:

- Marketing and copywriting
- Front end web design (particularly using bootstrap/pure frameworks)
- Back end web development (PHP, Laravel, Python/Django)
- Desktop App Development (C#, Python + PyQT or Tkinter)
- Photoshop for marketing graphics
- Social media marketing
- Launching and promotion of multiple products
- Own my own business and self employed.
- Account cracking

How much time do you devote online per day?

I'm usually online 7-10 hours (10am - 8pm) but sometime more and sometimes less depending on my workload.

Which of the above mentioned categories describes you the best?

I think Marketers/Entrepreneurs would fit best, since I have launched multiple products on HF, plus two companies (not on HF). If that section is full, i'd also be a good fit in Developers/Programmers/Coders since i'm a web developer by trade.

Do you have a portfolio or example of previous works?

Ebook/Guide - <https://hackforums.net/showthread.php?tid=5029286>

Account Generator (re developed from the group up, tons of unique features coded by me, largest account gen on HF) - <https://hackforums.net/showthread.php?tid=5008635>

Netflix Generator (completely custom coded from scratch on the laravel framework + thread design done by me) - <https://hackforums.net/showthread.php?tid=5203818>

Also quite a few products i'd rather not link here but would be happy to show in PM.

Let me know if you have any other questions.

I used to be Community Manager, Forum Mod and Admin in game on RSPS. I had one notable
rsps I created with my friend that had 200+ players called calantro 677. After a few months our
developers left and it went dry.

I also had a Instagram with my friend one was Luxury and Inspirational quotes. We peaked 5k
followers on both but then we closed it down due to no income or revenue and we didn't have time
to maintain it.
