Thread: [How can I use proxy through a slave rat? It's possible?](#)

bix93c - March 15, 2016, 10:02 am

I need a method to exploit a slave on a rat. there's a rat more 'led program for this function? Thank to all mates.

Reece Morgan - March 15, 2016, 10:46 am

I assume you want to use your victim as a proxy, in which case most RAT's provide something to do just that :).

See [Imminent monitor](#) or [Luminosity Link](#)

This dudes got a LONG way before you can just give them a pointer like that, check his posts, he dunno what hes actually trying to accomplish. Other than the fact he wants around a website ban.

Regardless of whether or not he would be able to use the information he asked for effectively (or at all), it was the information he asked for. Better to post something than nothing, as somebody else in a similar situation might find this thread (and my reply) useful.

Can you tell me a method to pass traffic from one VPN to another on the same computer without using so virtualbox?
