Thread: [\[TUTORIAL\] Dystance's Sig Tutorials](#)

Dystance - March 15, 2016, 1:17 pm

This is my contribution to the gfx section of the forums, these are tutorials I made about 5 years ago. These are at the beginner level for signature tutorials. These are all 100% mine, just used different username back then. If you are just starting out, there are some good techniques to pickup in these tutorials.

The purpose of these tutorials is to get the user to become familiar with using different tools and applying them to small canvas designs.

Any links to any sites on the actual tutorials are probably dead sites so don't worry.

Tutorial 1:

Love these type of tuts, like to see how people do things differently!

Dystance - *March 18, 2016, 2:56 pm*

Thanks for the comment and for taking a look! Seeing what other techniques people have used has helped me understand how to use the tools in PS more efficiently. Might drop some of my old PSDs in the resource section, keep a lookout for that!
