D-ban is a great tool and is the most trustworthy eraser there is. Highly recommended, nice TUT.

Nice tutorial, DBAN is a great thing to have by your side, a little tip though... maybe put the images in spoilers :P

I used this one time when the FBI came after me for ddosing the other computer on my home network with cmd and LOIC

But to be serious, this is a great tutorial from OP. Used this software in the past and it works really well.

now I can finally wipe all my cp pictures, with CP I mean cheese pizza ofcourse.

And some cp porn, but with cp porn I mean club penguin porn.

You know eh, rule 34?
