I have this photo below:

I just want to add something on the left of the chest or left shoulder (the right on the photo, where the blood is). I want something rugged but elegant, I don't know if the blood is the correct choice (the blood I added sucks).

If you can help me, I'm in your hands.

Thanks in advance.

(I started a similar thread, I ask moderators if they can close it. Thanks.)

Don't host it on dropbox, you're the only one able to see those pictures

Thanks man, I'm making them public.

Does anybody can help me?
