Thread: [1 Year of Free 1GB RAM VPS](#)

Performer - March 16, 2016, 8:26 am

So basically Amazon lets you register a VPS for free for 1 Year at them. It comes with 1GB RAM and you can even choose Windows. It sets up desktop access automatically.

Here is a guide to how: <http://www.massplanner.com/full-instructions-get-free-windows-vps-year/>

Enjoy your automated services! ?

SIM-964740 - March 17, 2016, 2:57 am

Thanks man, I heard about this a while back but just followed that guide now. Got my self 12 months. Also you don't have to be a US resident; that's a bonus!

Truth - March 17, 2016, 2:59 am

I can vouch for this but the VPS is kinda inconsistent in terms of internet speed.

BooGod - March 17, 2016, 3:08 am

Thanks for the share, this is amazing!

Performer - March 17, 2016, 3:22 am

So far I have no problems. I am running Massplanner 2 on it and it works great, at least with below 15 accounts. Glad it helped!

Aw, it takes \$1 fee like paypal. I don't have it...And I do not find where to install the OS and get the RD login info

Über code - March 17, 2016, 3:44 am

As I know it needs a debit/credit card and charges \$1 also a phone verification.

Yeah, my payoneer account is empty so I will need to wait for that Server but it's a nice share anyways!?

Ov3rFl0w_ - March 17, 2016, 3:48 am

Nice offer, thanks for share

anyway this is no difference between 5\$ unlimited traffic and this one :)

Performer - March 17, 2016, 3:48 am

Please read the guide in the link carefully. Everything is very well explained. Also, yeah you have to verify your identity and payment methods but it is still free worldwide! :D

GhosttoPhantom - March 18, 2016, 7:44 pm

You said it's from Amazon. Does amazon have this stated on their site some place?

Performer - March 19, 2016, 1:01 am

DinkaDanka - March 20, 2016, 12:57 am

Thanks buddy it's a really good start for those who are on low budget. Well explained link, and the most important: Free :)

Cheers

Np at all my friend. Glad you liked it.

GhostPlayer - March 22, 2016, 5:08 am

thy 4 sharing that:3 Will test it :)

Performer - March 22, 2016, 12:47 pm

Np at all man. You'll definitely find it useful.

kyansvk - March 26, 2016, 5:45 am

Can't run shit on the free tier low-spec VM. Good share tho Azure is better imo.

Im running Mass Planner with absolutely no probs

rapid1me - March 30, 2016, 3:35 pm

Thank you so much for such a nice share.

I gona try it out soon and will be back again here for sharing my experience regarding VPS.

Keep smiling please and GOD BLESS ALL.

I haven't been charged either. ?

lpfacun - April 3, 2016, 3:05 am

sad. phone verification I typed my pin correctly still cant verify. Now I have to wait 12 hours lol.

Raijin - April 5, 2016, 12:41 am

I'll be signing up for one at some point, thanks.

Also here's the direct link: <http://aws.amazon.com/free/>

Proliad - April 5, 2016, 10:02 pm

You can make both a linux and windows VPS free (i think, at least on my older acc you can)

SIM-3127652 - May 5, 2016, 2:33 pm

thanks it just worked and still works

Performer - May 8, 2016, 6:20 am

NP maxsolo. Its really great, I must say!

Grey Goose - May 10, 2016, 1:48 am

Thanks for sharing! Just what i need for my new project!

indig0 - May 10, 2016, 2:31 am

Sick find, thanks dude, really needed this.

P??????d G???I???? - May 11, 2016, 7:17 am

I already know this, but I have a problem with my all VCC, I always got EC2 restricted on my account :(

Glovekian - May 14, 2016, 6:06 pm

You can use Amazon AWS, or even Microsoft Azure but you need a real CC virtual CC wont work

sanchez324 - May 15, 2016, 1:49 am

Great offer thanks for sharing this with us all!
