Max Payne - March 16, 2016, 11:22 am

poopoo shit kardoffl clone slammed by madddie. heres funny pics
also, ven0m people are fags quit leeching credit u noobs

this is how he gets 'PC ID' which he then compares with some shit

this then jumps to cheat downloading.

it downloads from here ->

<http://fakeedgeboys.com/leakish/65ds6a545d345sa/d765a654d654sa/432fdasdg2d6g.dll> (dead link
now so loader doesnt work)

to here -> eax=D04508 "C:/Windows/System32/oxie.dll"

also his cheat has ayyware chams pasted in (very epic [we probably could have guessed this])

cracked loader + dll (get ur own injector) -> <https://puu.sh/nlOXR/39876d17ce.zip>

another edit -> he uses a .ini file to log errors and shits (idk why anyone would think this is a good idea)

s.o to morgan (gave me loader and flamed them [famous erper]), d3x (cus hes cool), aethi (famous erper), kelse (also famous erper),

ddddddd - March 16, 2016, 11:25 am

The funny part is that this is not the csgo "cheat scene" (in case a real scene ever existed for csgo).
This is just a weird little subculture with people that think they are important in their little corner of the "scene".

I mean seriously .. websites with .xyz domains or .io?
lol

i mean atleast people with .io domains pay more than 1 cent for their domain

virulence - March 16, 2016, 3:17 pm

I was getting worried about the lack of cheat cracks in this subforum during the past few weeks, thanks for bringing back hope.
