Thread: [Wicked - | General Discussion | In Development \[Need Beta Testers\]](#)

Big Tony - March 16, 2016, 11:55 am

This thread will be edited later with progress on my project.

Wicked is a forum that I'm working on. It's an underground general discussion and marketplace community. By underground I don't mean black-hat, I just mean it's designed to be for a tight-knit community family that may grow in the future.

What I've got so far:

- Domain
- VPS
- MyBB Installed
- DDoS Protection
- Some plugins installed + a theme that's being worked on

I'm looking for a select few people that would like to be beta testers on the forum. I'm going to have several custom features later on and I promise this forum will be successful. Beta testers will receive exclusive awards once the site is open to the public.

PM me for the domain and my Skype.

That is rather silly, honestly. I assume he has the idea that an upgrade makes a user a bit easier to trust.

Good luck with the site.

You're wrong. Statistically, users who hold a rank above l33t are more likely to fuck you over on HF.

Don't use Skype, but I'd like to beta test nonetheless.

I never owned Ubers.io or was part of the establishment of that forum.

I'll send you a PM with my Skype and forum.
