You need to set HF in the same timezone you actually are ([UCP](#) > Date and Time Options > Time Zone).

Preview : [\(Click to View\)](#)

How to install it :You will need to install a script manager :For Firefox, use [GreaseMonkey](#).

For Chrome, use [TamperMonkey](#).

Then, just go [here](#) and click on "Install this script", and then on "Install".

If you want to review the source, just click on "See the source of the script".

Let me know any bugs/ideas you want.

Enjoy.

I'm currently using this. Very helpful indeed.

g?th - December 20, 2016, 6:29 pm

Your scripts are awesome, thanks bro.

Tid?es - December 20, 2016, 6:31 pm

Rather than "reputations left today" I believe it should be "reputations remaining"

B?ker - December 21, 2016, 2:17 pm

Man only if this worked with quick rep

funtela - December 21, 2016, 7:43 pm

This is awesome man! Thanks for this :)

Bennynguyen100 - December 21, 2016, 8:14 pm

thank you so much for this! This is actually so helpful.

Is there a PM timer script?

I doubt that will be made.

Why not though?
It should be so simple.

Usual scripts are made for reasons that all members could use. Ubers wouldn't need that.

Patzan - December 21, 2016, 8:24 pm

Posting to install later.

True.

Does anyone recommend other scripts?

I just started to download some scripts.

I didnt think much of them at first.

My boy snorlax made a script to fix that:

<https://greasyfork.org/en/scripts/2948-hackforums-net-automatic-pm-retry>

Holy crap! Thats so sick!

So it will auto send after timer?!

Bennynguyen100 - December 21, 2016, 8:43 pm

Ohh okay. So it automatically sends after the cooldown is done, but you have to leave it on that screen. Kinda useless because you still need to have that screen open, but still nice.

So its not like, you can just go back to HF homescreen after you send the PM, and it will send when the timer is done, you have to be on that PM screen.

Unfortunately, scripts have their limitations. :p

mfw this gets attention 9 months later

Working ?

You can make it better because I didn't even understood if its working or no but its working.
