Thread: [\[FREE\] Net Ghost - Fresh Proxy Scraper & Checker \(30,000+ proxies/ FAST / HMA & more\)](#)

Decim - March 17, 2016, 11:30 am

REGARDING THE VIRUS DETECTION:

These are caused due to me obfuscating the executable with ConfuserEx to protect it. Look it up if you have to.

It is not infected, but simply don't use it if you don't trust me.

Everyone using v1.3 or below, re-download the latest version from the official site.
Your version of Net Ghost will work fine, but you need to perform this one time manual update to continue getting automatic updates and support.

Got suggestions? PM me.

This is a new and updated thread.

Anyone having trust issues, feel free to take a look at the feedback on the first thread.

- Arcanecfg

Brotherhood. - March 17, 2016, 11:48 am

This looks sick!

thanks for sharing

Thank you for the vouch, much appreciated.

Armada - March 18, 2016, 5:24 am

Although I likely will never use this personally, this deserves a ton more recognition that its getting.

I want you to know your efforts are appreciated, and also have no idea why a member of your durations never upgraded, but as a thank you from the community I helped a bit.

Enjoy l33t status bro. Thank you for the hard work and dedication.

- Dont forget to enable 2FA! ?

Does it give some sort of error before crashing?

It could be a network problem causing the updater to crash, there's no reason for this to happen though.

This looks more like an issue on your end.
Try installing .NET Framework 4.5. If you already have it installed, reinstall a fresh copy.

mettbrot - March 20, 2016, 4:53 am

thank you for your work, im really in love with your tool

Decim - March 20, 2016, 9:34 am

EDIT: Forgot to say, thanks this program is actually great!

Too lazy to remove it from there.

LoveOverFear - April 1, 2016, 1:26 pm

A Suggestion? If you Update this in the near future is it possible if you can implement something that can give more info about the proxies like if it's Elite, Anonymous, Transparent and possibly Country? Maybe it's too much to ask for but it would really blow every other service out of the water if it possibly had some of these view able. So far i still haven't had any problems with the program, it's still working good!

Decim - April 2, 2016, 3:56 am

This isn't possible without a server, which I'll have to pay for.

I have already implemented a manual version of this by which you can select a particular proxy and get all the information you listed.

I have also added an option for the user to select the type of proxies he/she wants to grab. So, if you only want a particular type of proxies, you can do that.

I'll be pushing this update in a few days.

Ostra - April 2, 2016, 8:12 am

Looks cool, hope you can put up the link again. I really need a mass proxy checker.

LoveOverFear - April 2, 2016, 4:32 pm

Can't wait for an update but are you sure it would require the server to check if a proxy is transparent or not. PHP does it very easily. Due to your software's limitations I went about writing some code to check transparency. I believe you can convert it over to vb.net but it would likely slow down your program, it would have to be an optional check-based feature.

I would love for the program to be able to resize. Sometimes I like to split applications on my screen and Net Ghost likes to overlap. In doing so, the Checker's results section would be nice if it would resize as well, dynamically of course. Then you'd only need 2 columns until there is 3 or more and with resizing it would all fit :).

The Original list section could also be a bit smaller, it looks like its the size it is, due to your timestamp in the file.

Next to the "NET GHOST" title, a logo would add that much more of an extra "style" but its not needed.

Only Other suggestion is a button to stop "grab proxies" from working. Reset does nothing for me.

You will still need a server running the PHP script to test the request headers.

Thanks for reporting the Reset button glitch, it was an issue I had completely forgotten about.

Artrax - April 6, 2016, 11:34 am

Hi can you please send me the download link? i Dont have 25 post (

Decim - April 8, 2016, 9:04 pm

Too lazy to.

It doesn't really bother me.

ttyler333 - April 14, 2016, 10:02 pm

IT does for me when im trying to update and avast keeps deleting the new file.. adding an exception doesnt seem to work. Ah well. Just was a suggestion.

Decim - April 15, 2016, 12:20 am

(Apr 14, 2016 10:02 PM)ttyler333 Wrote: [\[CITE\]](#) IT does for me when im trying to update and avast keeps deleting the new file.. adding an exception doesnt seem to work. Ah well. Just was a suggestion.

I'll see what I can do to fix that.

v1.3 is out.

* Added more sources. Added option to minimize to tray.

Added new icon. Fixed RESET function.

Added an option in the proxy checker to check against particular URL. Changes to proxy checker UI.

Added option to analyze/check anonymity of selected proxy.

* Minor cleanup to proxy checker.

Enjoy.

ttyler333 - April 15, 2016, 9:41 am

Status says "done checking: idle" but clicking reset says "Currently busy grabbing proxies". I assume thats also why my checker is not checking the file i had loaded. The ip addresses show up in the "original list" but when i click start, nothing happens.

edit: I selected the wrong file and all of the ip's were invalid now but closing the program requires going to task manager since "net ghost is busy grabbing proxies"

Decim - April 15, 2016, 10:32 am

One of the proxy sources is responding in a weird manner causing Net Ghost to keep on checking for a long time. This is what is preventing you from closing it.

I'll have to remove that site and push another update to fix it.

As far as the proxy checker goes, it seems to be working fine for me.

dopepizza - April 15, 2016, 10:42 am

The new update looks really good man. Nice job on that.
Also, is Net Ghost open source or?

ttyler333 - April 15, 2016, 7:43 pm

Why not use timeouts? you could use timeouts for some of your calls. Set the timeout for like 10 seconds or 20. Maybe initiate a timer to check those requests that cannot have timeouts and stop the process after 10 seconds as well.

Decim - April 15, 2016, 8:51 pm

(Apr 15, 2016 07:43 PM)ttyler333 Wrote: [\[CITE\]](#) Why not use timeouts? you could use timeouts for some of your calls. Set the timeout for like 10 seconds or 20. Maybe initiate a timer to check those requests that cannot have timeouts and stop the process after 10 seconds as well.

Timers? Nooo.

It does use timeouts. It just so happens that the source that is currently causing issues requires multiple requests in series and only one of these requests is malfunctioning, causing all the other requests to reset.

I've already fixed it in my version, just want to wait a little while before I push another update.

CHAOs - April 15, 2016, 9:00 pm

Sick thread.

Thanks for the share OP.

AlirezaVF - April 16, 2016, 2:59 am

Can you tell me exactly when it freezes?

If it's while using the proxy checker, simply decrease the number of threads you're using to a number that is supported by your system.

Decim - April 18, 2016, 7:40 am

This is still working great, enjoy.

PONI Walker - April 19, 2016, 9:27 am

It's looking very good, really thanks for sharing!!

one of the best I've ever seen! literally thousands in seconds!

S3Linux - April 20, 2016, 6:13 am

Send me it in PM, thanks ?

Wespa - April 20, 2016, 9:59 am

Looks amazing!

Looking forward to testing this.

ThePurge - April 20, 2016, 3:43 pm

Posting to come back later

SlinkyMate - April 21, 2016, 1:23 am

I love this tool. But recently with the new update it gets stuck on grabbing proxies around googleproxies24. Due to this I have to close it via task manager. And when I check the proxies and export it, the file is bigger than the original grabbed proxies. And there's around 28k when only 2k is valid. Not sure if it's this version or just me having issues. Any help would be appreciated. Thanks ?

Artrax - April 21, 2016, 4:15 am

Tested this out. Realy work. Thank you!

Decim - April 22, 2016, 5:09 am

Glad you guys liked it.

Decim - May 3, 2016, 7:51 am

No problem, glad you liked it.

Cinderellas - May 3, 2016, 9:29 am

Awesome program, easy to grap and find working proxies :) Thanks!

hairypets - May 3, 2016, 2:15 pm

Hey, when I start grabbing proxies, after a short time, the program crashes.
What could be the problem of this?

In addition, when grabbing them again, the proxy count stops at about 10000/20000 every time.

Thank you

Decim - May 5, 2016, 8:02 pm

(May 3, 2016 02:15 PM)hairypets Wrote: [\[CITE\]](#) Hey, when I start grabbing proxies, after a short time, the program crashes.

Thank you

It has never crashed before, I can't help you with that unless I had more info.

As for it stopping at 10k, it's possible that your network or ISP has blocked access to some of the sources.

Try grabbing the proxies while using a VPN and let me know the results.

This is still working great, folks.

LaiLaiZhen - May 6, 2016, 6:22 am

Net Ghost is awesome. Thanks for the proxies man.

BetaSec - May 6, 2016, 6:32 am

phearz - May 8, 2016, 9:37 am

thanks for this tool man appreciated

MrMagikarp - May 8, 2016, 5:17 pm

Vouch! I always used this on your website but never posted on your thread!

trglock - May 8, 2016, 7:15 pm

nice post, legit program here

one2seven - May 10, 2016, 5:36 pm

This is a great program! However, I'm still stuck on version 1.0.0. It won't upgrade itself.

lastly, I would like to suggest some features that would be useful

I was wondering if you can add a feature that can organize the proxies in numerical order based on their response time. Also, it would be greatly appreciated if you can also add a feature where the program will only show certain proxies based on country. (For example, if I'm only looking for US based proxies, the list will remove all proxies that are not US based and will only show the ones from US)

Huge thanks OP!

balha - May 10, 2016, 7:26 pm

Woow!!

Thank you very much for share it!

korsangazi - May 11, 2016, 3:30 am

That's absurd.

All these detections are caused by the obfuscation using ConfuserEx, which if you take a look at
the detections, is pretty evident.

I can assure you that this is not infected.

Here's the VT scan with no obfuscation:

<https://www.virustotal.com/en/file/adda8b0c26ddae0c2073afd7750691c74c1e5cc05bab7f11feff96e1140a3308/analysis/1464711565/>

That's weird. You could try forcing WinRAR to ignore the warning as follows:

Open WinRAR -> Options -> Settings -> Viewer -> Set . in the 'Ignore modifications for' text field.

Let me know if that worked.

OkioP - June 11, 2016, 3:22 pm

Miniscule - June 11, 2016, 9:13 pm

What percentage of the proxies on average are anonymous, and is there a way to filter just anonymous ones or elite or just filtering out specific proxies in general?

Please PM me answering my questions, thanks.

Decim - June 11, 2016, 9:15 pm

(Jun 11, 2016 09:13 PM)Miniscule Wrote: [\[CITE\]](#) What percentage of the proxies on average are anonymous, and is there a way to filter just anonymous ones or elite or just filtering out specific proxies in general?

The sources it scrapes from mostly only contain anonymous and elite proxies.

There's no way to filter it based on anonymity at the moment since that would require setting up a server.

Dankarooni - June 12, 2016, 4:39 am

Really nice looking UI! Good job!

Tenshirocks - June 21, 2016, 4:39 pm

(Jun 22, 2016 10:11 AM)?ll????? Wrote: [\[CITE\]](#) Thanks for this program! I have a question about where the grabber exports the .txt file to, where can i locate it to check proxies?It exports it to a text file in the same directory as Net Ghost.
If you click the Check Proxies button after grabbing, it will automatically check the proxies it grabbed - you don't have to manually import it.

D34D. - June 25, 2016, 12:10 am
Thank you for this
just what i needed

Silyk - June 25, 2016, 7:15 am
It's amazing, the only thing I think it's lacking right now is the ability to add/remove sources. Some of the ones that are currently in the app haven't been updated in quite a while, which makes majority of the proxies invalid. Removing those sources would speed up not just the scraping process but also the checking one by a ton.

Monostable555 - June 25, 2016, 7:45 am
Thanks, this is a great tool and it works wonders!
Thanks for the share!

ygliam - June 26, 2016, 11:55 am
Hey, love the program, is there anyway to export the working proxies after checking them.
I cant copy them either. Thanks

Decim - July 6, 2016, 6:49 am

I'll be releasing v1.5 in a few hours which should fix all known issues related to the proxy checker.

CHANGELOG:

Code 1. Fixed proxy checker not exporting.

2. Fixed lagging while running proxy checker.

3. No more flashing screen while running proxy checker.

4. Drag and drop multiple proxy lists onto the proxy checker.

5. Added an option to let user forcibly close Net Ghost if it is busy grabbing proxies.

If there is anything else you would like me to add, now is the time to let me know.

Net Ghost v1.5 is now out, simply run your version of Net Ghost to automatically update it to 1.5.

AngelsPlayToy - July 7, 2016, 7:30 am

AlirezaVF - July 14, 2016, 8:06 am

bug report :

when we grab proxy and save them . they are thousand of them that reaped again .
search around proxys you will find out that each proxy exist more than 2 times in the grabbed list .

pls fix this .
thanks

Dave from the lawyer firm - July 14, 2016, 9:23 am

great job! keep up the good work and thanks for the share <3

+King - July 15, 2016, 5:43 pm

Thanks for the contribution to the community!

Juksu5 - July 17, 2016, 5:45 am

Thanks for sharing this! Really good work. +rep

R0YB0Y - July 17, 2016, 7:39 am

THIS LOOKS SWEET, Thanks so much for the share

Decim - July 21, 2016, 9:57 am

(Jul 14, 2016 08:06 AM)AlirezaVF Wrote: [\[CITE\]](#) bug report :
when we grab proxy and save them . they are thousand of them that reaped again .
search around proxys you will find out that each proxy exist more than 2 times in the grabbed list .

pls fix this .
thanks

I don't think that's possible since I've implemented checks to prevent this exact situation.

GreyZarcovski - July 25, 2016, 10:15 am

Recently Net ghost has been stuck on grabbing proxies and will freeze around 20K then crash when checking.

Decim - July 25, 2016, 10:56 am

(Jul 25, 2016 10:15 AM)GreyZarcovski Wrote: [\[CITE\]](#) Recently Net ghost has been stuck on grabbing proxies and will freeze around 20K then crash when checking.

Have you updated to the latest version? I don't see any reason for it to crash while checking.

ChromosomeCake - July 26, 2016, 9:12 pm

Works gr8 m8, thanks for sharing.

waypast - July 27, 2016, 7:10 am

thanks

Just tested this and it doesn't seem to be happening for me.

Is this common or was it just a one time occurrence?

Mukaboost - July 30, 2016, 2:09 am

Can you bypass private proxies database?

Puree - July 30, 2016, 2:26 am

Cool tool

gonna try it

Thanks mate

Decim - July 30, 2016, 4:22 am

(Jul 30, 2016 02:09 AM)Mukaboost Wrote: [\[CITE\]](#) Can you bypass private proxies database?
I don't know what you're talking about.

Decim - August 10, 2016, 7:01 am

This is still working great, enjoy.

seyo - August 11, 2016, 2:30 am

Well, idk if its a virus (which i dont know), but its a great tool. only thing is, it asks for update every start, but there is no update.

Decim - August 11, 2016, 6:48 am

It's not a virus, check the bottom of the first post.

Which version are you using? You may get that issue if you're running v1.3 or below.

Rayane13 - August 11, 2016, 3:20 pm

let me try this tool dude thanks you

RaidSecurity - August 11, 2016, 3:57 pm

Thank you very much for the upgrade man, I really appreciate it!z

The links are in the OP, you don't need to PM me.

Lukerich - November 25, 2016, 7:19 pm

Bot is very good at grabbing proxys and highly recommend it, however the proxy checker I am not sure about, I have ran lists on a 100% proxy checker website and the list witch all proxys should work only half of them are correct.

Program is still very good though and amazing at grabbing proxys, would highly recommend to anyone

Cacaoettes311 - November 26, 2016, 12:12 am

Good job ! thank's man !!!! :D

nate__ - November 29, 2016, 5:44 pm

I just unpacked the software, and used virus total on the inner software and nothing came up.

I also decompiled it, and uploaded the software's source code here :

ufile.io/9ba24

[edit] I read the source and the software seems okay, I also checked the latest version (the one on

github) and it seems too safe.

The only part of the code that could be used for evil is this (the password has to be md5 encoded and the cyphertext is base64 encoded) :

```
private void getStats()
{
    try
    {
        this.Invoke((Delegate) () => this.txtLog.Text = "Getting new info...\r\n");
        Decimal num1 = new Decimal(15, 0, 0, false, (byte) 1);
        string input = new WebClient().DownloadString("pastebin{dot}com/raw/7kcDT0fn");
        this.Invoke((Delegate) () => this.txtLog.AppendText(this.AES_Decrypt(input,
"x1kfl12k4japl"))));
        string input1 = new WebClient().DownloadString("pastebin{dot}com/raw/VAYUNc0W");
        this.Invoke((Delegate) () => this.txtLog.Text = this.txtLog.Text.Replace("Getting new info...", "
")));
        if (Convert.ToDouble(num1) >= Conversions.ToDouble(this.AES_Decrypt(input1,
"x1kfl12k4japl"))) || MessageBox.Show("An update is available!\r\nDownload the latest version?",
"Net Ghost", MessageBoxButtons.YesNo, MessageBoxIcon.Asterisk) != DialogResult.Yes)
            return;
        new
WebClient().DownloadFile("github{dot}com/arcanecfg/NetGhost/raw/master/NetGhost_Latest.zip",
"NetGhost_Latest.zip");
        ZipFile.ExtractToDirectory("NetGhost_Latest.zip", Application.StartupPath);
        StringBuilder stringBuilder = new StringBuilder();
        stringBuilder.AppendLine(":Repeat");
        stringBuilder.AppendLine("del \"Net Ghost.exe\"");
        stringBuilder.AppendLine("if exist \"Net Ghost.exe\" goto Repeat");
        stringBuilder.AppendLine("ren \"Net Ghost_Latest.exe\" \"Net Ghost.exe\"");
        stringBuilder.AppendLine("start \"\" \"Net Ghost.exe\"");
        stringBuilder.AppendLine("del \"NetGhost_Upd.bat\" ;");
        System.IO.File.WriteAllText("NetGhost_Upd.bat", stringBuilder.ToString());
        int num2 = (int) MessageBox.Show("Done updating!");
        Process.Start("NetGhost_Upd.bat");
        ProjectData.EndApp();
    }
    catch (Exception ex)
    {
        ProjectData.SetProjectError(ex);
        this.updateLog("An error has occurred while trying to fetch new info.\r\nError: " + ex.Message);
        ProjectData.ClearProjectError();
    }
}
```

coupdebex - November 30, 2016, 7:51 am

Program always stuck when scraping

Qim1 - November 30, 2016, 11:13 am

thank you bro :) keep it up!

Wow! Thanks man. Can't believe this is free.

Bloodfoldx - February 2, 2017, 1:59 pm

I extract the files into an empty folder and all I get is a ReadMe.txt file?

joseph_shenath - February 2, 2017, 7:23 pm

(Feb 2, 2017 02:59 PM)Bloodfoldx Wrote: [\[CITE\]](#) I extract the files into an empty folder and all I get is a ReadMe.txt file?

It's probably getting deleted by the anti virus. Exclude the folder from real time checking in anti virus. Windows defender deleted it too.

It stops at around 5000-8000 proxies won't go further regardless of how long I keep it running. And I cannot close it because the status is "Grabbing". Any help will be appreciated.

Decim - February 4, 2017, 12:59 am

I haven't checked it in a long time, it's possible that some of the sources aren't working like they used to.

Will completely rewrite this from scratch when I get time.

MoDev - February 6, 2017, 8:42 pm

Awesome! Works very well, beautiful thread design. I can't believe it's free.

Thanks for the share, OP! :)
