Thread: [Record Chaturbate Streams The Easy Way :\)](#)

Hi there :)

Today I'm going to share with you one of the simplest tools I've ever found.
Note: I'm not the creator of this software.

What is this ?

This tool helps you record Chaturbate streams with 1 simple click.

- Create lists of the models

- Save models lists

- Record Stream, Play Stream, Check status etc.

NOTE: videos are recorded in .ts format, I'm not sure if you can change this from the config file.
However afterwards you can manually rename your file from "GIRLSTREAM.ts" to "GIRLSTREAM.avi" or other formats.

Requirements:

Installed ffmpeg (put ffmpeg.exe in your Chaturbaterec installation folder !)

Works perfectly fine on Windows 10.

Ya stopped working like the others have stated. I think it has something with the site's recent major update.
