Thread: [>> Metro Thuggin's "Putty Booter" | VPS with DoS Allowed | 10gbps <<](#)

Metro Thuggin - March 17, 2016, 9:39 pm

Welcome everyone to metro thuggin's putty booter service.

This service will allow you to dos like a champ without using shitty booters and not having enough power to actually hit anyone.

This will be used for home connections only although you can try small sites.

You may do whatever with these servers, dos, make an irc and add these.

If you wish to make an IRC you may also pay me to help you set it up and add these vps's in there with a bot o you can control them from the IRC.

These vps's will come with scrips pre-installed and easy instructions.

I will accept BTC only for right now and AGC until my paypal is fixed, thank you.

\$5 a Server

\$50 for a IRC setup + 20 servers

Comes with unlimited bandwidth btw :)

PM to purchase :)

@Jupiter - March 17, 2016, 9:40 pm

vouch for op booterer, ?

Supreme_ - March 17, 2016, 9:40 pm

I haven't seen a perl dos script since 1965

IKR lol lets make the come back.

Well its to stop kids from asking where do I buy teh b00ters.

This is no profit for me lol.

Well it is a VPS so we know that wont be 100% accurate.

I dont have root on these servers so ill try to run a speedtest 1 min.

Update: Using speedtest, pushes out 70mbps.

? BoxyBabee ? - March 17, 2016, 10:00 pm

Interested in the irc with 20 rooted . My skype is hf.boxybabee
