Thread: [R8 Revolver Fade](#)

A factory new r8 revolver fade is only \$10. I have a theory that this skin will rise up in price since it's a red and a fade skin, and the gun is new. Thoughts?

AvaStone - March 17, 2016, 11:12 pm

no one is gonna buy a r8 xD

crazyshit - March 17, 2016, 11:38 pm

The r8 is like AvaStone, fucking useless.

So no i dont think it will rise up.

I bought a stat one 2 days ago and they've gone up \$15 on market. I'd say it's worth investing in one. It also helps that the Royal Paladin is shit. Nobody wants to trade them up = less of them now that the hype is long gone.

Nice theory I can see your new to csgo, in fact this gun went down in price and will stay down.

If it gets a buff its easy money. So might be smart to invest in a couple of them?

AvanH - March 18, 2016, 10:40 am

I don't think it will go up unless they buff it, or if they nerf the Deagle.
