Thread: [JAVA/C++/iOS Developer 4 Hire](#)

BitbyBit - March 18, 2016, 6:31 am

I can do large projects or small.

Each project will receive a particular quote according to the amount of work needed to finish it, message me your project details for a free quote today!

I've got a bachelors in computer science from a school who's flagship language is C++ and I'm working on a masters in Software Engineering.

Some of my favorite types of projects are those dealing with concurrency/threads and client/server based communications.

If you don't see a language you need a project completed in listed, still inquire.

I run a software development business and more than likely have an employee that can handle your project if need be.

I do prefer to work on HF related projects personally when possible though.

I can do mobile apps both android and iOS.

Backend setups and relational databases are also on the menu.

I ONLY accept bitcoin, chase quick pay, cash deposit at chase bank, money order and WU/MG.

I also accept escrow if we use Factor8 and you cover the middle man fee.

For large projects I offer a 10% discount for payment in full.

Stoned AF - March 18, 2016, 10:32 am

Nice, I will have concurrency projects soon. Can you pm or post your skype please? And do you accept BTC as payment? Thnx.

Zetsuei - March 18, 2016, 5:50 pm

By any chance would you accept paypal because I only have a small project for you to do

Moneyonly - March 29, 2016, 4:19 am

Pmed you, interested in a small projet

EVOLVE - June 1, 2016, 7:09 am

Just coded me a program! Awesome customer service and used a MM as requested! :)

BitbyBit - June 6, 2016, 11:41 am

It was wonderful doing business with you. ?

Taking new projects once again.

KneeGrowsMobbin - September 1, 2016, 3:32 pm

FUCKIG THE MAN SPENT 2.2k to code my app. knows what he's doing. goes above and fucking beyond amazing.

Vouch for bitbybit. Do not hesitate to deal with him.

BitbyBit - January 6, 2017, 2:53 pm

(Dec 18, 2016 09:35 PM)Einsteinium33 Wrote: [\[CITE\]](#) Absolutely the best coder I have ever worked with. We intitaly used an escrow service and he agreed to pay for half the fee since the project was well over \$1,000. Now we're still working on the same project without escrow as he has earned my trust. He's extremely professional and relentless when encountering complex problems. I'd recommend him to anyone and everyone. Thanks

Thank you for the feedback.

Taking new projects again.

Lord Gray - January 6, 2017, 6:18 pm

Hello, are you accepting Paypal? I only need a small thing to be done.

I have python bot but I would need it in c++, thanks.

#Exploit - January 6, 2017, 10:44 pm

Huge vouch for BitbyBit . I highly recommend him ,he is very talented and I was having a project with him and he did it perfectly. If you got a project do not hesitate do deal with him.

GL bro

Stoned AF - January 6, 2017, 11:20 pm

I may require your help with C++. Is there any way I can get you on Skype bro??

Birdperson - January 19, 2017, 12:59 pm

Currently on my phone so if you could PM me,

I've at least \$30K app which needs developers.

BitbyBit - October 9, 2019, 12:19 pm

I am taking new projects again.
