Thread: [\[Official Group Eternal\] > Recruiting Marketers < - Apply Today](#)

Peeka - March 18, 2016, 9:04 am

*Please note [Nex+](#) is in charge of accepting applicants. I am no longer a part of this group.

Eternal is comprised of some of the most talented and skilled businessmen and marketers. Please make sure to read what eternal is all about [here](#).

Many of you may have seen us lurk in the shadows, but no more! Eternal is proud to announce that we are opening recruitment up as now. There are very few restrictions to applying (detailed below) so feel free. Applications should consist of a detailed description of work you have done in the past, honestly, and your real self.

All recruits will be placed under probation for the first few weeks. This is to ensure that we grab the best of the best to be the best. We want you to succeed as much as possible so we may push you to your limits to see what you are capable of. During the trial period, you must prove yourself to use. This means doing outstanding work, and showing us that you care.

To apply, please use the following format. Please do not contact a leader about your application or ask to apply privately, you will be ignored and probably denied from entering.

What are you good at:

Affiliate marketing,

Forex exchange

Account cracking

Software creation

Graphics design (3+ years of experience)

Social Media Marketing

Work you have done in the past: I haven't been able to do much as in contests wise so far as i've only returned to HF but I have done random acts of generosity. PM me if you really want to see them. I did create a graphics tutorial thread however which took a lot of time:

Why should we pick you over someone else: Over the course of 2 years or so i've made roughly \$30,000 dollars yet this number is still growing. My addition to the group would be extremely valuable as I could give inside knowledge and an insight into advanced Affiliate Marketing and investing through Forex or penny stocks. I spend most my day on HF and i've been very active ever since I have returned (6-7) hours per day. Finally, I could design for the group free of charge which is always a plus.

What is your experience specifically with marketing:

2 Years of experience owning a Ebay shop partnered with my dad which raked it at least £100,000

Succesful online shop + website which made a lot of money (my first real big profit) which is still online but inactive.

1 Years worth of knowledge of the stock market taught by my brother who was a stock broker but now is a teacher.

I've flipped OG's on Social Media for chump change (made roughly \$500) in the past 2 months or so.

Finally, i've currently taken in a interest in Social Media Marketing and monetising mostly through Instagram so i'm still acquiring experience.

However Im not to bad at coding (HTML,CSS websites basically)

Also I dabble in SQL injections, though I have turned a way from most Blackhat stuff

Work you have done in the past: (Any contributions to HF)

I haven't done giveaways of the sort but I do like starting conversation with the occasional tutorial.

Probably some more but here are some

Why should we pick you over someone else: Well it saddens me to think that I might get into a group but only at the falt of another HF member not getting in.

Though as stated before I am myself IM no Leo DiCaprio who will put on some stage persona or kiss ass to get in. I made a thread a while back asking HF members why they come back as I was having some problems with being a regular. Well give me that reason I hope that by having an interesting group that will push me to keep going back and being active.

What is your experience specifically with marketing: Him good question Marketing was never my main focus but I have done some get-rich schemes that included CPA sites and promoting that if that counts.

OK first thanks for reading the most important thing you can do right now is just give me an answer. Whether I'm accepted or not. If not if you have the time to critique my application or just tell me why I wasn't accepted that would help so much so that I can improve my self in the future.

OK getting to ass-kissy see yah

What are you good at: Advertising, appealing to a lot of people, website building, ext.

Work you have done in the past:I haven't given anything away if that's what you're asking, I've paid a bunch of people to do stuff for me so I "contributed" to their wallet.

Why should we pick you over someone else: I started a website with community and hardly any money for advertising and I grew it bigger than I ever thought I could.

What is your experience specifically with marketing: I kinda taught myself everything I know, I'm pretty good at clickbaiting as I've been working on it for along time. I managed to SEO my site without any help or any "guides". Almost all my visitors are coming from google, you can check my Alexa ranking information. If you haven't picked up already I'm very proud of my website, I worked as hard as I could on it because this one kid told me it was a shit idea so I dedicated an insane amount of time to it just so I could pm him how many visitors I get in 24h.

What are you good at? Professional Writer and Content Creator

Marketing (Did a lot of marketing from marketing small sites to music bands to local and international countries too). Big experience with CPA.

Languages (Fluently speak English Arabic and Italian. Plus I'm a beginner in Hebrew and Spanish) Professional in Leadership and Management and hard worker under pressure.

Social Engineering- Professional. I've been like 6 years doing online stuff. Did almost every single method out there. And I have a vast experience and knowledge about making money online.

P.s: I'm checking what other members are putting in their applications. If such things count I have many many other skills.

Past work?

Marketed ten bands and one solo dude on social media and offline and got them to the next level. Wrote some articles and won awards for. Plus I sold few for website owners to put on their site back then.

Social engineered many stuff from real and physical object to online money and crypto currency. Tried almost all the methods on the internet since I used to spend like 5 hours per day trying methods. So I can easily know the good and the bad.

Opened a small business in my county where I used to resell items I buy online with 500% profits per item.

I do have many more things but I can remember those right now.

Why should we choose you?

Because I'm a really hard worker especially when it comes to making money online. I also believe that such group will surely do amazing and revolutionary projects since we're all gonna bind our skills together to give a masterpiece. I do have different ideas that also would really be great starters for the group the will surely rock the market either on HF or outside. And I'm sure they would make bank once they're done. Plus I think I'd be better to fill out the spot because I have a long and vast experience about making money online. Thus I can differentiate between stupid time wasting projects and good ones.

Why should we pick you over someone else:

This, is honestly, at your own discretion. I'm not going to give you 100 reasons why I'm better than the next person, but instead let you decide for yourself. I have been on HackForums since December 2013, and have tried to stay as HQ as I can the whole time.

What is your experience specifically with marketing:

- own a social network boosting shop that sold over \$750 worth of product due to marketing
- marketed my e-book to sell over \$300 worth of sales
- graphic design service that I was able to market well enough to sell \$250 of the service
- did CPA for a week a while back and was able to make a solid \$65

Thanks for considering me, and good luck to everyone who has applied!
