Thread: [\[Request\] Chrome extension that works with netflix](#)

Blacklisted. - March 18, 2016, 10:59 am

Mine just stopped working and I'm in the middle of a series, would really appreciate any help here.

My bad, I really should have put more detail.

Basically, I used a Chrome extension to access US Netflix shows - but netflix has started to detect it and I can no longer use it

I was hoping for someone to link me a new extension, or even VPN that is compatible with netflix.

wana finish walking dead :<

You could use a VPN to get American shows, thats what I do whenever I want to watch some CA shows with my pals

DrinkV0dka - March 23, 2016, 7:44 pm

If you're still looking for a way, you could try using dns to watch the shows. If you search Netflix dns you should be able to find quite a few results. I just find that this is better since it doesn't really affect anything else, just streaming sites.

I know it isn't a plugin but I find this works better.

netflix has cracked down on them

they don't work for me anymore.
