Thread: [How to increase Instagram Traffic?](#)

How can I increase the traffic I get on my page?

Right now I'm mass following people interested in the related niche, but it's not enough.

I'm getting ~35 clicks a day. I've seen people getting 500+

What are some other ways to increase Instagram Traffic other than mass following?

I would as well like to know this and see what people got as far as tips and such.

Try to comment under big accounts. With a nice clickbait so they will come to your profile.

How great? What are some of your stats with it?

Earnings? Followers? Etc

You bet it does, the software just wouldn't be complete without it.

You can use various bots. That will surely bring you some traffic.

I would use gramboost.

They have a thread on HF.

Well Instagram temporarily blocked me from following profiles.

It's been like 20 hours now, only got \$2 because of this today fml.

Planning on getting a set-up with ~10 accounts running my CPA niche.
