website - Code <http://www.tubebot.tk>

Download Link - <http://www.mediafire.com/?nzzfjtnnt4>

The View Increaser will only work if you have activated tube bot or downloaded the view increaser verification code, the rest of the features are free of charge.

The activation code or verification code is not required to use tube bot, unless you want to use it without any limitations

Proof that it works, still getting emails too lol. Thanks OP

The view increaser feature works a bit like viewtubetrain, when tube bot is running it will browse all the urls sent by users so everyone is increasing each others views, this method is the only one capable of bypassing the freeze-mark because proxies can no longer be used to cheat youtube's view system. Anyone who promotes tube bot will be given a free activation code, for more information on this please checkout my website.

If you experience any errors please tell me so i can fix it

Ikenna - July 4, 2010, 1:50 pm

ill test on my laptop ;) looks good to me

forget it hate thos surveys

tehwezz - July 4, 2010, 2:20 pm

There's no survey. A mediafire link at tubebot.tk.

Good work if it work.No not a scam, the reason i'm using .tk is because i have recently made tube bot 2.0 so i hav'nt made much from it yet, btw you don't have to pay to use it only if you want to use all the features without limitations.

Sylent - July 4, 2010, 2:54 pm

Nice I love downloading a program that dosnt do anything besides ask for activation code.

I have looked through the program and havent found one free thing avaiable to even test it if it works yet he wants money so I can activate it LOLZ.

SORry sir but I think I will keep my moneyz

What features are free?

None

There is nothing here that is useable without paying you for code jack ass

With you can add me it would be nice :)just tested it the feature works, you did add the channels you wanted to subscribe to in the correct format right? also you must be using the one account mode if you want to subscribe to alot of other users.

N3w_2_H@Ck1n™ - July 5, 2010, 7:52 pm

When the program is ran, the following directories are created:

- o %AppData%\Tube Bot
- o %Programs%\Startup\windows
- o %Programs%\Tube Bot
- o %ProgramFiles%\Tube Bot

Care to explain why it makes a folder called 'windows' in startup?

Irion - July 5, 2010, 7:56 pm

Obviously a hack behind this. I don't think it's binded to anything, already in the code. I wouldn't download it !

xGEARSxOFxHELLx - July 5, 2010, 9:34 pm

its like a fake app with backdoor maybe but ...im not going to even download it
