Thread: [elementary OS?](#)

Underd?g - March 19, 2016, 11:00 am

Just downloaded and installed it. Look pretty decent so far.

I'm thinking of using it as my main. I don't do much other than surf the internet so would do me fine I think.

Has anyone got more experience with it? what do you think?

I have considered buying it and trying it out :)

I used it as my main for a few months, it sure is elegant.

I've been using it on-and-off for around 2 years. I like their focus on UI/UX.

I installed it a few days ago and so far so good.. I love it.

(It's my first linux distro so I may be wrong) I'm not too sure if I can really super customize it, like I see other users with borderless windows etc.. Feel free to let me know If i'm wrong.
