Thread: [Need Help With Hacking Gmail.](#)

Becky G - March 22, 2016, 7:05 am

I'm not anywhere near new to hacking so this isn't some baby request to hack my gf or anything.

I've acquired the gmail of a person through a Oday, salted hashes were weakly implemented and I was able to crack it. My attempt to log into the gmail did not fail, I was successfully able to log in but I was unable to acquire a Denmark IP (Owner is from Denmark) so now it is asking the security questions, I don't have the phone number nor backup email. How do I now evade this?

f1re_w1re - March 22, 2016, 8:01 am

Try to look for proxies based on Denmark, this is something that you would want to try.

<http://free-proxy.cz/en/web-proxylist/country/DK/all/ping/all>

Hope that helps you in some sort of way.
