Thread: [Question about creating a SatoshiMines Bot... Paying if someone can make it happen!](#)

teeftoof - March 22, 2016, 8:15 am

I want a bot for satoshimines that bets X amount in the spot where the last bomb was. It will keep betting there till it wins, then it will bet where the NEXT bomb was. For example:

First bomb is row 1, column 1.. it bets over it (giving it a '1 streak security')

It wins.

The next bomb shown is row 3 column 4 so it bets there, and keeps betting till it wins, and goes on to the next bomb spot... etc. This will give a '4 streak security' on the same spot. I know bets are unique to themselves but this still feels right and I want a bot that does it.

Is that even possible on satoshimines to program something like that?

Please respond as it has been VERY hard to get an answer. I am a coding noob.

Odus - March 22, 2016, 8:59 am

The thread under your own is the source of 90% of the bots you see in the marketplace. Wouldn't be difficult to tweak to your needs

Oliver Sykes - March 22, 2016, 11:10 am

Shouldn't be hard. Just take Odus's advice and modify BahNahNah's bot if you can't/don't want to do your own.

teeftoof - March 23, 2016, 8:52 am

I am a noob and need someone to do that for me. Can somebody do it? I have been trying to contact Bahnahnah for 2 weeks now.

Where would I post for that?

Oliver Sykes - March 23, 2016, 4:50 pm

(Mar 23, 2016 02:52 PM)teeftoof Wrote: [\[CITE\]](#) Where would I post for that? Marketplace; preferably in Buyer's Bay. Or you could pm someone with a thread in service offerings.
