<https://imgur.com/a/WrQiz>

I've collected some psd files that have websites designs, it's completely free to download, I didn't create them, so thanks to those who did, you can use them however you want them (in a good way) you can code them, or just navigate through the psd file, so you learn how to create website designs by yourself.

Please Keep The Thread Alive, if this thread gets hot, then, I post other fully coded websites.
