Do you still honor the refund policy?

I would only give a refund if the buyer follows all the steps taken or he has a valid reason. But I still have the final call to give the buyer a refund or not.

How many times my eBook rights have been sold lol

OP sent me this method to take a look at. Going into this, wasn't really sure what it would talk about since the thread design negates everything that I would generally associate with a working method to making money in CS.

Over all, I can't really say I didn't expect what the method talked about, but it does indeed work..just takes a bit more time than one would think.

If I were to rate this method, would probably give it a 7/10, simply due to the fact that it is a bit time consuming.

It's not personally something I would use because my time is worth more than the money I'd make from it..it's pretty self explanatory though, you could probably figure it out yourself if you looked around lol
