Although didn't yet have the time to read through it all.

The book itself has around 70 pages and damn you'll learn a lot. Whether you're a newcomer or an advanced user, this e-book will guide you on every step of the way, you will get TONS of knowledge which can later on be used in all around internet marketing, but also marketing in general.

Bonus content fits the method and gives you quite some headstart.

I love the book and will make sure to read it all over again.

I'd dare to say that you can cover the costs of the e-book in a few days if you put at least a bit of effort into it.

The author explains the ins and outs of affiliate marketing and goes more in-depth than the average guide. He shows you how to effectively do each step and scale it and target your audience to the highest level possible.

Ease-of-Use: 8.5/10

The steps in the e-book are step by step and easy to follow through. The only thing is that it's time consuming but isn't all money? It's worth it if you work it.

Easily scalable and workable if you put the time in.

Grammar: 10/10

Great grammar and punctuation, don't believe I saw any mistakes at all. Even if there was any,

that's how little of a problem it was compared to the entirety and quality of the e-book.

Overall: 9/10

Even though this has to deal with affiliate marketing and things along those lines, he gives sources that aren't publicly known and tips on how to properly do Keyword research and target audience research. He also

goes as far as to give you help on setting up your product and how to effectively market it to people whether you be a newbie or experienced. I give this e-book a thumbs up!

Why do you want to review "The Breakthrough Method": I would like to see what this "breakthrough" is, I've been internet marketing for the past 3-4 years and have read through thousands of methods and believe my review would be very suitable for you. I've been to the point where I was a noob and not a noob struggling to make money and have had made money to know where your potential customers lie in their perspectives and mindsets.

Past experiences with E-Books: Created a few, Read thousands. Continually reading many a week, whether it be money making, self improvement, etc.
