Thread: [\[Recruiting\] Dawn GFX Course](#)

Novica - March 24, 2016, 3:14 pm

[img]http://hackforumswiki.net/images/1/18/Dawn_%28Banner%29.png[/img]

In about a week from now I'm going to host a GFX Course within the sub-forum of Dawn. The course will be based around cartoony style, and we'll be mostly focusing on Photoshop.

? How is this going to work?

Each week I'll post a lesson/tutorial. For example, in the first week, we'll focus on the pen tool; we will cover how to use it properly. After that, we'll move on to coloring, shading, etc. Also, each week you'll be given a different assignment to accomplish. For example, after the first week's lesson, you'll have to create some simple shapes using the pen tool.

Please note: If you fail to accomplish the given assignment, you'll be kicked from the group. If you don't think you'll be able to handle turning in your homework on time, don't even bother applying.

That's pretty much all you have to know for now.

? How can you apply?

Fill out the following form, and post it down below. Also, please do not PM me.

Code [b][color=#b82933]?[/color] How old are you?:[/b]

[b][color=#b82933]?[/color] Why are you interested in this course?:[/b]

[b][color=#b82933]?[/color] List some of your previous work:[/b]Note that even if you are new to Photoshop and graphics design in general, you may still apply.

EDITED/UPDATED

? How old are you?: 17

? Why are you interested in this course?: I greatly admire your unique graphics skills, and I would love to learn more about digital drawing skills and hopefully being able to create a few small designs of my own with your mentoring. I am relatively skilled in using Photoshop for general digital graphics, such as thread designs and signatures, but I've never tried drawing before. I even bought my own tablet pad for drawing a year or so back, but I have barely used it.

? Why are you interested in this course?: I go to school for Art and Graphic Design, so I draw and use photoshop a lot. I mostly just draw right now so this could be a good refresher into using photoshop. I feel joining this joining this course will help refine some of my photoshop skills, learn some new techniques, and give me the opportunity to meet some new people.

? How old are you?:

17

? Why are you interested in this course?:

I want to improve my graphics designing skills and want to do better at it. Would love to learn from others and improve my GFX skills. I am really interested in learning cartoons and other stuff that Novica does.

? List some of your previous work:

I've done a lot of graphics in the past, but since I did all this for fun, I didn't really make a portfolio, but here's some of my work, just some of it, I can do a lot better than this:

<https://imgur.com/a/2LUfn> (Contains both animated + some work that I've done for servers/youtube

channels)

And also, a giveaway I did a month ago, made signatures for HF:

<https://hackforums.net/showthread.php?tid=5157206&pid=49673196#pid49673196>

It would be an honor to be part of this group and learn more.

? Why are you interested in this course?:

I have been using Photoshop for around 3 years now, and I just can not seem to move ahead for some reason. I am stuck with just using basic tools and coming out with half decent work.

It would be fucking amazing if I could join and expand my knowledge and skillset of graphic design, especially with you!

You do an amazing job, and I'd love for you to be my mentor!

? How old are you?:

I'm currently 18

? Why are you interested in this course?:

My main interest is to make better album covers for my music. Plus GFX is just a good skill to have honestly.

? List some of your previous work:

I used to make a lot of forum signatures, because I thought those were the coolest things in the world. I don't have a lot of examples except for these two. I made them a long time ago for a friend, but he never used them so they've just been sitting in my imgur.

Spoiler ([Click to View](#))

this one is my favorite

And then I also made the cover for my first music project. It's mediocre at best, but it's something.

Spoiler ([Click to View](#))

I also made an album cover for my friend's up and coming project, but I can't show that at the moment. Just thought it'd be worth mentioning.

I want to learn GFX so I can finally get past the simple stage of things.

? Why are you interested in this course?:

Always have been quite interested in Graphic Design. Have had a service on HF about 2 years ago that got over 30 clients and I made about \$400 from it. I was always designing flat designs however, and now I would love to look at new design such as cartoon-type design to expand in my graphics capabilities. This would mean a lot to me to be included in this course.

? Why are you interested in this course?: I have been experimenting with GFX for a month now, and I'm beginning to like it and it's a possible minor in college I plan on taking. I want to learn more than just adding text, then addin filters lol. I'm looking forward to learning new styles.

I'm interested in WebSec and homelands security topics in college, but I've always had a creatives side, and Graphic Design is definitely something that allows me to express that, while still being around computers. I'm a quick learner :)

? Why are you interested in this course?: I am looking to expand my knowledge in the graphic area and this seems to be the way to do it. I mainly use my graphics skills for creating logos, avatars, backgrounds, stuff for monetizing (video and website stuff) and then I am currently going through alot of different videos and guides on the internet and trying alot of different styles etc in photoshop, so still learning, but not completely noobish :D

? List some of your previous work: Havent really done much that Ive posted here on HF, but I did create a thread with some signatures I made: <https://hackforums.net/showthread.php?tid=5186948> . Currently working on other versions of it.

? How old are you?: 27

? Why are you interested in this course?: I have been editing pictures in an artistic way for some years now. I have been using mainly pop art studio 6.5. During the years I created some posters for live shows for some underground bands and 6 CD and book covers. I like pop art studio because it is easy to learn and express emotions through it. Expressing despair, anger or lust is really easy if you know how human vision/perception is distorted under these feelings. Aesthetically it has some limitations though and I want to learn using photoshop. I could focus on studying tutorials but I find them a bit boring and not engaging at all.

? List some of your previous work: Since my work is publicly posted and I want to avoid any doxing thing that can happen in hackforums I created really quick this image
<http://postimg.org/image/fgoe9a5ip/full/> hoping it will be enough proof that I really know the basic stuff of photo editors.

Thank you for giving me that chance to learn new things.
