Thread: [CSGODOUBLE coins glitch during Steam downtime tuesday?](#)

**4gotn** - March 24, 2016, 3:16 pm

I'm looking for a reputable member that I can tell this to, to see if this glitch is reproducible and if we can even do it again. I found out by complete accident and was able to do it from start of downtime to about 12pm est next day (with sleep in between ofc). I am unable to do it again and want to find someone to see if they can do it. I don't want to tell my friends about it because they might tell others and it'll be patched. This requires no scripts/hacks/outside sources. I was recording with obs but the video froze and all I have is sound. I'll be back in a couple hours, peace.

The exploit is that the servers bug and you whitdraw the items, but keep the coins, gamble them and win more with coins that's supposed to not be there.

And does it work?

**dalejr2155** - March 26, 2016, 10:05 am

I've had this a few times myself as well. I'm still trying to find this exploit, but so far it just seems to happen at random times. I just spam the trade button, and like one in a hundred trades it gets withdrawn without taking coins.

I've seen this happening with my friend. Deposited a \$400 knife withdrew some shits and after some time when he logged back had \$400. He was happy af.
