Great job.

I was going to finish a project and AE was the right tool to use, especially when trying to animate text.

In Premiere Pro didn't manage to figure out how that can be done :(

CJamie - April 6, 2016, 8:46 am

Great contributions, good luck.

Premiere Pro has fewer effects.

Is more realated to fast video editing and AE is the one with the effects.

I mean some things you can do in Premiere but some are really tricky to execute.
