The gift cards sell \$16 cheaper than usual. This is due to the BTC rate. So out of 1 BTC, you aren't making 30-60% off each gift card (like he stated in his thread)

Scammed for \$45 BTC:

I know he wouldn't do this but he explained it VERY vaguely

I bought a method and we both agreed on me paying half of it first and then paying the rest when I get a gift card for about 30-60% of the price

I go on the website where he tells me to buy the gift cards and I see that most of them are 0.1% off or 1% off instead of it being 30-60% off like he described. This is where I misunderstood. However, he then tells me the currency is the glitch here and that you can get the currency cheaper on the site where you buy from to redeem onto the other site where you can actually get the desired gift card. This isn't a method. This is just the currency is messed up so you will be saving about \$15 out of 1 BTC (as it hasn't updated the recent currency). That's not saving 30% or anywhere near the minimum he stated.

We can let HF users decide whether this is a legitimate method or not if he gives me permission to share with you guys.

Will update with pictures/proof if he can't explain me the reason.

Keeping dispute open just incase I get rep-fudged by him.

So far, I'm not happy with what he has done unless I completely misunderstand this whole method, which I'm pretty sure I don't.

UPDATE: He is also selling someone else's method which he has no right to (apparently).

I did mention that I will allow him to speak for himself before I do post pictures.

I have done now but blurred any hints to the method.

I have to explain the method to OP.

I'm sorry but you are replying very slowly from time-to-time compared to before when I was asking questions.

Also you said it will take a day to setup.

How is a supplier suppose to suddenly accept a 50% rate in just a day of dealing?

You never noted that it will take a couple of weeks or months to set this up.

User " Game Freak " sold my method that someone else bought off of me. Will be opening a community alert on this.

I sold this method to his IRL friend, and now he's here reselling Lool.

Edit: <https://hackforums.net/showthread.php?tid=5200792> his buddy.

Will be opening thread again.

These are guys are a group of scammers.

Deal with caution.

Game Freak told Grievous (part of the group) to -rep me because it would obviously be sketchy if he did it to me.

Method is public (obviously now because they stole the method)

I can't believe high-rep members are doing this.

I can't wait till the day he gets ban for only \$45 LOOL.

I can earn this back in minutes with eWhoring xD

Grievous negged me because he didn't like a thread I made. don't let his rep affect your mind. Just keep it HQ and you should have a great time here on HF?
