Thread: [Free bustabit script - Busta-A-Follow | Follow anyone you want easily](#)

Peeka - March 26, 2016, 10:01 am

To use this script: Copy and paste into bustabit, change the base bet to whatever you want

In spam channel, type \$follow {username} to start following them

If the username does not bet, you will not bet

Disclaimer:

Vouch for my boy Peekka, with this script you can make stacks by following any high profit making user on BustaBit.

Sure, we can go with that I guess.

This is not one of Dexons's scripts. Next time please look at them before you start accusing people for taking others scripts.

I made this script. Dexon has one that does a similar thing, yes. But this is not his script. Please go away.

This is dexon's script:

Engine is a object provided by the game. I don't see how it is saying it's not defined.

can we make profit from this ? or just follow someone for fun ?

It's more about fun. I mean if you play your cards right and tweak the script, you could possibly make money from it.

rollers31 - March 26, 2016, 2:15 pm

Is not that supposed to follow someone's strategy in terms of where they cash out and if they play or wait for next game? It says "Did not have enough bits to place bet" eventhough I set my basebet 1 and have more than that.

My bad! I never hit save changes. Apologies.

Ooze - March 26, 2016, 2:23 pm

Thanks now I'll just follow you since you won't give me your script
Even though Ive been ass kissing all week

You just type \$follow username

in the chat. But you will need the working script first. I will be updating it soon.

Script is fixed. Sorry about that. I capitalized a c xD.

Katsuo - March 26, 2016, 2:44 pm

So it's supposed to follow them but does not do the same bet as them? I don't understand
edit: It followed him one time then stopped?

It can't do the same bet. Bustabit does not give us that information.

It follows them, cashes out when they cash out. It will also bet when they bet. Just not for the same amount.

hugsyou - March 26, 2016, 2:55 pm

idk who to follow but i am giving it a go with a few cents

rollers31 - March 26, 2016, 2:59 pm

It's a little bit laggy. It is probably the issue on the bustabit side though. For example, if the person I follow cashes out at 1.10, the script will always lags and cashes out .01 or .02 above.

Idea! What if it just bet one time behind them?

So it watches there first bet then when they bet the second time it starts to follow behind them?'

Example:

Following

- nothing because you just watched his 200 bet
- 200
- 400
- 200
- 400

Getting followed:

- 200
- 400
- 200
- 400

Yeah haha, I'm not sure which is conventional for JavaScript, but for Java, we keep it on the same line :P

I am professional with PHP, not javascript but I really like using

```
public function method()  
{  
    ---if()  
    ----{
```

. The reason it's like that is because that is provided as the base script.

The house is gonna always win!!!

illusiOn555 - November 8, 2016, 9:37 am

this seems dumb because people that are making tons of money are using scripts
your script cannot follow there script

say im following the guy making the most money i bet 100bits he bets 10000bits
and then it busts right?
now his next bet will be 20,000 and mine will still be 100
and it works

hes getting his money back because thats what his script is doing... ill only be going back to where i
was in that said scenario

SPONGEBOZZ GUNSHOT - April 14, 2017, 8:25 am

Nice thanks man i love you ! ?

Brooklynwest - May 19, 2017, 11:42 pm

I've had some success with this script. I don't believe in leaks, so I'm not going to put it out for the world, but it's only \$5 to try. You lose that making one dumb bet. payhip.com/b/e7kH

oops, forgot the http in front of it. you know what i meant.
