First method is strictly for CS:GO only! Scroll down for method 2 if you would like to earn BTC, CSGO Skins or Steam Gift Cards!

Good evening folks! Not sure if this had been posted before, but this is something that I have been using for a few weeks and I have really enjoyed it. I have been using this site to do some surveys for CS:GO skins if that is of interest!

ref link: <http://csgopoints.net/?ref=76561198022206985>

non ref link: <http://csgopoints.net>

Would heavily appreciate if you would sign up with the refferal link, however that's all up to you. If you need any help whether you have signed up with my ref link or not, please do feel free to message me and I'll help you out!

This site will let you choose whatever skin you want, and then it'll be ordered for you on the steam market, so the cooldown will be 7 days. However every 24 hours they're running "Instant Skins" which are skins that are already in stock, and can be ordered for instant delivery. Thought it would be a good idea to share it before the major so you can stock up on some skins! ? I'm from Denmark so I don't know about offers in different countries, but I've heard that the US has some amazing ones with great payout! I wasn't sure whether it was legit or not, but as I recieved my Famas Styx a few days ago, I thought I'd post it on here to share it along!

My offer recommendations:

Playing games is my favorite way to earn the points, especially offers like Grepolis, Warthunder and Pirates which all have great payout for the short amount of time it takes to complete them.

Method 2:

Same principal as above, however this one is for everything and not strictly CS:GO. With Tremor Games you can complete surveys for skins/keys/games/steam gift cards/BTC, whatever you please!

non ref: <http://www.tremorgames.com/>

This is almost the same as the other one above, however this one has quicker payouts! Your skins/keys/games will most likely be approved within 24 hours by the administrators. When you reach level 3 or so, it'll be instant access to the bot! As I mentioned before, if you need any help please do contact me!

I have withdrawn several keys from tremorgames, aswell as a Famas Styx from csgopoints, so they're both legit :)

Proof of withdrawals:

(enjoy my amazing paint skills!)

Have a nice day! ?
