Thread: [Bad URL Shortener - Possibly the worst url shortener on the internet! \(With a twist\)](#)

DarkN3ss61 - March 27, 2016, 6:50 pm

Hey guys so I am currently working on an unusual sort of URL shortener, its called Bad URL.

Basically you give it a URL and it spits out something that would make everyone suspicious and not want to click it. Its really made to play jokes on your friends.

Here is an example of a URL

Input: google.com

Output: z8ai.cf/girlsgonewildpart1.wmv_7dx3ov_not-a-virus

So the link to the website is <http://badurl.ml/> (Will get a new domain soon)

But I need the community's help, as I need ideas for blocks of text to add to the database.

Such as: not a virus

moms movie.mp4

enlarge your penis

etc

These are the parts of text that get added in the url to make it look super dodgy. So any suggestions and I will add it into the database.

Thanks guys!

That. Is. Amazing.

Add some porno titles.

Put any of these words before "fetish":

Poop

Piss

Tentacle

Scat

Gore

etc. :)

Oh, maybe throw in "2 girls 1 cup"

BatDan - March 31, 2016, 11:23 am

This is really a great idea, I can imagine something like this going viral. Try adding some fancy background to make it look more appealing?

Glad you like it!

All I can really say is lean PHP, once you know PHP its quite simple. The hardest part is doing the URL Rewrites(Which isn't hard once you google it to find examples)
