Thread: [Selling access to my Plex Server \(Movies & Shows\) \\$5](#)

Skeetz - March 28, 2016, 1:58 am

I have a plex media server setup with a ton of movies, tv shows, music, and anime. With new movies & shows being added weekly. The box that provides this server has more than enough CPU power to stream over 20 concurrent movies, over 4TB HDD with more space being added soon.

One month access is \$5, Once payment is received I will add your plex account to my server. You can also PM me to add new movies, tv shows, music, or anime.

For those who don't know about plex, Plex is supported by: XBOX360, Xbox one, PS4, Most Samsung smart TVs, Chromecast, Roku, And more.

Check it out @ www.plex.tv

Pm me for any other information!

NoBarsHandler - March 28, 2016, 2:46 am

Interesting.

Do you have list containing your media collection? Also, are the anime subbed or dubbed?

Skeetz - March 28, 2016, 5:12 am

(Mar 28, 2016 02:46 AM)NoBarsHandler Wrote: [\[CITE\]](#) Interesting.

Not yet I am currently working on one. When it comes to the anime Users will have the option to either listen to dubbed or standard audio /w or without subs (Up to you).

Ellie Is Bae - March 28, 2016, 5:29 am

Can vouch for Skeetz, this guy is legit - he won't let you down :)

janwillem123456 - March 28, 2016, 5:39 am

I am interested in this, do all the movies have English Subtitles?

FreeAnneFrank - March 28, 2016, 5:41 am

Any movies or series that have subs?

Or anything german :D ?

Skeetz - March 28, 2016, 5:47 am

(Mar 28, 2016 05:39 AM)janwillem123456 Wrote: [\[CITE\]](#) I am interested in this, do all the movies have English Subtitles?

We are working on adding subtitles & new content currently. But yes when we are finished id like to have subs for multiple languages.

(Mar 28, 2016 05:41 AM)ichfickdeinkopfdubastard Wrote: [\[CITE\]](#) Any movies or series that have subs?

Or anything german :D ?

We do have subs for some of our movies, Currently adding more.

If you would like a movie to have german just pm me the title and i will add the subs.

MathiasHansen - March 28, 2016, 5:48 am

Is this legitimate, as in you pay the distributors for their license?

Skeetz - March 28, 2016, 5:51 am

(Mar 28, 2016 05:48 AM)MathiasHansen Wrote: [\[CITE\]](#) Is this legitimate, as in you pay the distributors for their license?

It is not. This isnt netflix.

MathiasHansen - March 28, 2016, 5:58 am

(Mar 28, 2016 05:51 AM)Skeetz Wrote: [\[CITE\]](#) It is not. This isnt netflix.How do you provide your customers with safety? Why would I use your service over something like PopcornTime, which provides me with a free service like yours, just with an insane amount of broadcasting.

Just wondering why I would pick you, when my safety is at great risk the day you get caught.

Skeetz - March 28, 2016, 6:06 am

I dont plan on giving access to a abundant amount of users. This is all under plex, When i give users access they dont even get a IP to connect to. Your plex account will be given access to my server.

As for why i would use this over popcornrttime.
You need a VPN to use popcornrttime.

You are downloading the movie, With my service you are streaming content.

Police would have to go through plex to get my servers ip. But i dont ever see that happening with the amount of users i will allow.

access to that one day, and then I would be arrested for possession of piracted goods?

- a) PopcornTime does not require you to use a VPN; it recommend it.
- b) I am not downloading the movie on PopcornTime, I am streaming it.

You just stated the two only facts you thought differentiated you from PTime, which were false.

I am not trying to bash your sales, I just know how all this works from personal experience. I just want to make sure if I do buy access to your service I get my safety for buying it.

I just don't understand how you are going to safe-keep my information.

Where is your server located?

Spooky And Fluox - March 28, 2016, 6:14 am

Vouch for skeetz he's a very trust worthy guy

GreyHatZone - March 28, 2016, 6:19 am

At this point stfu mate, all you are doing is sale trashing. If you don't want it don't sales thrash. OP I will be considering this very soon...

Skeetz - March 28, 2016, 6:20 am

(Mar 28, 2016 06:12 AM)MathiasHansen Wrote: [\[CITE\]](#) -snip-

I do not own plex. Plex has been around for a long time with the sole purpose of hosting media ie movies and shows. Do you really think everyone on plex has a license to host the content that they add? Be serious with me m8. If they store your ip thats beyond my knowledge, Though i've had this server running with users already using it for over two years & i've yet to see a fed pull up in my driveway and arrest me. I can't wait for it to happen srsly.

I just downloaded the program for the first time and those where the two warnings it showed me. In the time it took me to download the first movie i could have streamed 10 minutes into my show already. This is a personal server with a limited amount of users. I assure my video load times will surpass any oversold streaming service that is out currently. There is no load on my server, and if I run into any latency issues with my server ill purchase another and split my client base.

My server is located in canada.

I just don't want to pay \$5.00 for something that gains me nothing over PopcornTime.

Instead of having my information stored, I could just buy a VPN through PopcornTime, have my information a tad bit more secure, limiting my chances of being caught.

I'm sorry I am not someone who just buys shit, and then get arrested a month later.

Without an IP how do you expect users to connect? Via a domain? That's pretty much the same thing.

And to stream you have to download.

Bo Burnham - March 28, 2016, 6:24 am

Vouch for my weed-loving friend, he is trustworthy and eats dem pizzola footlongs. 10/10

HQ member here, don't hesitate to purchase.

My server is located in canada. Sorry, I did not know what Plex was, I just thought it was your service.

But, I can't follow your sense as per the; used it for two years and not being caught does not play a role, it can happen, and it most likely will, everything does.

So your server is located in Canada? That would scare me a little, as that really limits my safety. Couldn't you get an off-shore server instead?

Skeetz - March 28, 2016, 6:25 am

(Mar 28, 2016 06:21 AM)Orgy Wrote: [\[CITE\]](#) -snip-

You would use Plex. They have a online applet that would automatically connect you to any servers that are shared with your account. The applet secures everything sent between the server and client and all data is encrypted.

If you want more information about plex please visit their website. www.plex.tv

Where did you find this information? I was searching various places to try and gather some information about their safety and security for their customers and I found nothing.

- > Flinging or casting content using our Plex Companion protocol will not always be secure.
- > When making use of a "Manual Connection" that you've specifically added in particular Plex apps (e.g. Android or Plex Home Theater), the communication won't be secure.
- > Internal, local requests from the System and Framework components to the rest of the Plex Media Server are over regular HTTP. These requests are only on the local machine itself.

That is what is being saidtated on their very own website - but you just stated they encrypt connections? That is not what is being said on their website.

> myPlex acts as a hub, providing connection information between Plex clients and Plex Media Servers. However, myPlex is not involved in any actual communication between a client and Plex Media Server.

> Some unencrypted connection (originating from this host) will still be allowed when set to "required."

They do not have any safety - and if they do, it is so limited. I am sorry, but I would just be way too afraid to risk me being pulled in for shit because Plex can't ensure my safety. This could be done so simply, but all they do is provide you with a hub, that does nothing but providing a communication

between your media server and me, the customer.

Edit: Oh.. you removed your post about linking me to how to add SSL..

Where did you find this information? I was searching various places to try and gather some information about their safety and security for their customers and I found nothing.

By applet i was talking about the webclient. Which is secure.

(Mar 28, 2016 06:32 AM)MathiasHansen Wrote: [\[CITE\]](#) > Flinging or casting content using our Plex Companion protocol will not always be secure.

My server requires all connections to be secured or i will not allow the app to connect to my server.

(Mar 28, 2016 06:32 AM)MathiasHansen Wrote: [\[CITE\]](#) > When making use of a "Manual Connection" that you've specifically added in particular Plex apps (e.g. Android or Plex Home Theater), the communication won't be secure.

You won't be connecting to my server manually. You will be using plex to connect. You need my servers IP to connect manually.

(Mar 28, 2016 06:32 AM)MathiasHansen Wrote: [\[CITE\]](#) > Internal, local requests from the System and Framework components to the rest of the Plex Media Server are over regular HTTP. Are you done yet?I updated my post, check it out.

What makes no sense to me is; you keep saying I won't directly connect to your server, I will be doing it through Plex – but in the end, I will still have a remote connection to YOUR server, as that is where it is all hosted.

All-in-all, some of my information, is being stored, and that limits my safety a lot.

I don't get why you have to be all defensive, I am, just as well as ensuring my safety, also caring about yours. You might not have known all this.

If you want me to stop, then have a great day.

The only information thats being stored is hosted by plex. You make a account on their service. Not mine.

I get that you are assuring your safety but someone would have to report my activities and provide proof for anything to happen here. I guarantee you cannot pull my servers IP from plex's client or apps.

Poutine - March 28, 2016, 7:11 am

Vouch for OP. I'll be posting here frequently. For now it's already worth my 5\$

Skeetz - March 28, 2016, 7:37 am

(Mar 28, 2016 07:11 AM)Poutine Wrote: [\[CITE\]](#) Vouch for OP. I'll be posting here frequently. For now it's already worth my 5\$

Thank you for the vouch. Anyone with questions feel free to pm me.

Skeetz - April 29, 2016, 12:05 pm

Still selling access to this server, more movies have been added price remains 5\$

HOT DOG™ - May 28, 2016, 11:51 am

Damn after reading this the fact that people think they will get arrested for this is laughable. Don't comment on something unless you actually know what it is.

Skeetz - June 18, 2016, 12:14 pm

Still selling this, hmu guys!
