Thread: [Any ideas on how to get 5000 facebook friends?](#)

Briceag - March 28, 2016, 1:13 pm

Doesn't matter if they're real or not, i don't even want to see their shit on my timeline. Just to have them 5k.

Most tutorials are patched.

Make a girl facebook account and let the friend request come to you, you'll have 10.000 friends soon.

Probably the easiest method if you aren't looking to invest in a bot.

Just find a few pics of a girl that don't look blatantly fake, pick a standard header image, put some basic info in the bio and add a bunch of people.

You'll have a ton of friend requests in no time. Just takes a lot of clicking but it's free and will do the trick. Good luck.
