Quickest Bot / Exploit to rape fuck out of a ecatel with?

need one asap got some cocky kid's ecatel don't have root tho

anyone here be able to shell it or something they can have

trusted only!

AndreaEbbasta - March 28, 2016, 9:52 pm

You can DDoS her server easily. Ecatel = No Anti DDoS

Private666 - March 28, 2016, 9:54 pm

I'm looking more lines of permanent suspension

Start DDoS 24/24 ecatel probably suspend ?

J?son - March 28, 2016, 10:14 pm

hit the IP till they nullroute. obv

?Criminal - March 30, 2016, 12:16 am

You guys are misunderstanding him he has SSH credentials to an ecatel box and wants to use a local root exploit to root it from what I understand.

Young Sosa - March 30, 2016, 12:19 am

I think he want to upload a shell for DDoS with them...

No he has root to a server of a person he doesn't like. He wants to ban said server. Easiest way would be to start a bruteforce on the Internet, or DDoS.

Sorry, but you're wrong, He has a user account, not root, Already tried a kernel exploit to gain root privs, didn't work.

But yeah, a DDoS Attack would work with perma suspension.

Don't know how I missed the part where he said he didn't have root. My bad. He should still be able to launch an attack with the server to get it banned.

xlEvil - *March 30, 2016, 4:43 am*

You can DDoS her server easily.

Expel - *March 30, 2016, 6:36 am*

Search Google for public kernel exploits, enumerate SUID/SGID binaries, check the crontab, enumerate installed software, look for insecure file permissions, try getting access to other accounts on the system, etc.
