Thread: [Stolen main account](#)

ChemicalBRH_stolen - March 29, 2016, 8:58 am

Hey HF :)

My main account ChemicalBRH (that now is Meme.) was stolen..

I've got the original email address and I already contacted HF by Contact Form lol. What should I do for verify that?

Here is the account UID: 2841416

Sorry, I forget it

Stolen accounts usually won't be recovered, according to the help document below. If your account was used to scam, it definitely won't be recovered.

What the fuck this just got confusing. So you have hacked his account?

12Chainz - March 29, 2016, 9:04 am

Yo Meme. mind doing a Gauth Validation if it's really you? That should settle this quickly.

Gauth/2FA: Enabled Today

This just changed lol wtf

Meme. - March 29, 2016, 9:07 am

My 2FA is on so :) Not sure how to prove it anymore.

Anyway don't worry guys.. I'm very happy to collaborate with staff members.. They can see my IPs, where do I live and all the things lol.

I'm not worried.

Last Gauth/2FA Validation: Never
Never though?

\

L?g?nd - March 29, 2016, 9:10 am

I disabled my 2FA without putting in any code. Validate your trust scan not disable it then enable it again.

Actually nevermind, you're using different credentials that you have control over so obviously you can validate it. You fucked up though, you needed to validate it before disabling gauth because after you disable it anyone can activate gauth again.

With that and the IP changes, things don't look good for you.

Roger Waters - March 29, 2016, 9:18 am

Accounts that are compromised or stolen without Gauth enabled Will Not be recovered.

I can confirm the account was compromised and the account probably did not have Gauth enabled when the account was stolen and that the person who stole the account was bullshitting on this thread. If you don't take the time to secure your account with the tools provided to you, there's no reason for Site Administration to recover the account.

OP should use the contact form, but there's a 99.9% chance this account will end up closed and not recovered.

ChemicalBRH_stolen - March 29, 2016, 9:47 am

I just wanted to post this screenshot from Authy app. Is the only way to confirm that I had activated the 2FA.

Omni could go through your pm's and see which ones you are downloading. What's more interesting is how he managed to bypass authentication.

That does make sense. I think you may be fixed if Omni checks all your ips and looks for any "hacker".

I'm sure you've been answered already, but

Your IP you created the account with, city, inbox messages, payment proofs, last known passwords.

If omni reviews it, it will likely be closed, repfucked, banned, or all 3. But a homie can dream right.
